Title	Report Card Technical Guide
Revision	2
Issue Date	11/16/2017
Security Level	Public
Filename	Report Card Technical Guide 2016-17.docx
Changes	Gaps charts and calculations updated to reflect change to comparison trend based on # of years of target data. Student Achievement walkthrough wording corrected.

Using This Document

This document provides descriptions for calculating the scores comprising Wisconsin's Accountability Index, the basis of Wisconsin's Accountability Report Cards. This document focuses on the three school-level report cards—the School Report Card, Private School – Choice Students Report Card, and Private School – All Students Report Card—and their accompanying School Report Card Details, all calculations and descriptions also apply to the District Report Card and District Report Card Detail. Any differences between these report cards are specifically noted.

- Public report cards are available on the Department of Public Instruction's (DPI) website: http://dpi.wi.gov/accountability/report-cards.
- Secure report cards are available to authorized users in SAFE, the Secure Access File Exchange: http://dpi.wi.gov/wisedash/districts/safe.

This document connects the data on the School Report Card Detail to the school's **Overall Accountability Score** and corresponding **Accountability Rating**.

You can approximate the calculations used to arrive at a school's Accountability Index scores using data from the **School Report Card Detail** (secure or public) and this document. Scores calculated with this document may not exactly match a school's score due to rounding, both in the calculation itself and in the display of values on the School Report Card Detail.

For further information on reading and interpreting the Accountability Report Cards, or Wisconsin's accountability system, please refer to our resources available here: http://dpi.wi.gov/accountability/resources.

Table of Contents

Introduction

This Technical Guide is meant to provide clarity into the calculations behind the 2016-17 Accountability Report Cards produced by the Wisconsin Department of Public Instruction (DPI). Using this guide in conjunction with the Interpretive Guide will help with understanding and reproducing the scores that are on the report cards. Report cards and related resources can be accessed online: dpi.wi.gov/accountability/report-cards.

The Technical Guide provides a series of explanations and walkthrough examples for each of the four report card Priority Areas (Student Achievement, Growth, Closing Gaps, and On-Track and Postsecondary Readiness) and the two Student Engagement Indicators (Absenteeism and Dropout Rate). This guide assists in understanding public and private school and district report cards. The report cards are designed to reflect the performance of schools and districts regardless of school type—public, charter, choice, or private.

New in 2016-17 are priority area scores and an overall rating for schools in the Private School Choice Program. These schools received report cards in 2015-16 but were given a "Not Rated" rating due to insufficient data availability. Since report cards require at least two consecutive years of data, 2016-17 will be the first time these schools will receive accountability ratings. In addition to receiving a Private School – Choice Students Report Card that only scores students attending under the Choice program, these schools can opt in to receive a Private School – All Students Report Card that scores all students in the school (those attending under the Choice program and private-paying students).

Building the Overall Accountability Score

Wisconsin's school accountability system uses multiple measures across four Priority Areas and three expectations of student engagement to build a 0 to 100 point score for each school.

The Overall Accountability Score is derived from the Accountability Index, which includes separate scores for each of four Priority Areas—Student Achievement, Growth, Closing Gaps, and On-Track and Postsecondary Readiness—as well as deductions for falling short of statewide goals for the two Student Engagement Indicators: Absenteeism and Dropout Rate.

Like the Overall Accountability Score, each of the Priority Areas is scored on a scale from 0 to 100. However, because Wisconsin has schools of many different sizes, grade levels, and student populations, not all of the Priority Areas apply in the same way to every school. Therefore, combining the Priority Area scores to arrive at an overall score is more complicated than taking a straight average. The following pages detail the steps taken to calculate the Overall Accountability Score.

Background

The Wisconsin Department of Public Instruction (DPI) bases the process of building a school's Overall Accountability Score on three important principles:

1. **We cannot calculate every Priority Area score for every school.** For example, Growth requires the state to have test scores for consecutive grades; because Wisconsin only tests high school

students for accountability purposes in 11th grade, traditional high schools (grades 9-12) do not receive a Growth score. Also, every component of the Accountability Index requires at least 20 students with data to calculate a score. Some schools are too small to calculate scores for some Priority Areas.

2. **A school should not be advantaged or disadvantaged by the presence or lack of a Priority Area or component.** For example, simply averaging the Priority Areas would create a bias for high schools, which are generally not measured on Growth, increasing their overall scores compared to elementary and middle schools.

3. **The majority of Wisconsin schools have very high rates of attendance and graduation, the major determinants of the On-Track and Postsecondary Readiness Priority Area score.** Thus, On-Track and Postsecondary Readiness Priority Area scores are typically much higher than the scores of the other three Priority Areas. Allowing the weight of attendance and graduation to increase for schools and districts where other Priority Areas or components of this Priority Area are missing would create an unfair advantage for those schools and districts.

As a result, an overall score is calculated by considering the following:[1]

1. **The scales of Growth and Closing Gaps scores are aligned with Student Achievement.** Aligning scores to a common scale avoids creating a bias between these Priority Areas.

2. **The Graduation and Attendance components within the On-Track and Postsecondary Readiness Priority Area have a fixed weight no matter how many other Priority Area scores or components are calculated.** Because the attendance and graduation components cause the On-Track and Postsecondary Readiness scores to be much higher than the scores of the other Priority Areas typically, freezing the weight of these components prevents an unfair bias towards schools and districts that lack other Priority Areas, or other components of the On-Track and Postsecondary Readiness Priority Area.

Steps

The process for determining a school's Overall Accountability Score consists of calculating a **weighted average Priority Areas score** from the individual Priority Area scores, and then subtracting any applicable **Student Engagement Indicator deductions**. This method also takes into account state statutory requirements for weighting Student Achievement and Growth according to the percentage of students in a school or district who are economically disadvantaged. Note that the Priority Area scores provided on the front page of the report cards do not reflect this variable weighting; they are the raw unweighted scores. Only the overall score incorporates variable weighting.

The steps below show how a school's Overall Accountability Score is calculated using individual Priority Area scores and Student Engagement Indicator deductions. Details on how these individual scores are calculated are provided in the sections that follow.

1. **Combine Student Achievement, Growth, and Closing Gaps.** Begin calculating the weighted average Priority Areas score by taking a weighted average of the Student Achievement, Growth, and Closing Gaps scores, weighting Student Achievement and Growth according to the percent

---

[1] DPI has an Accountability Report Card Weighting Calculator that shows the weights applied to schools with different data availability and Priority Areas. See: https://oea-dpi.shinyapps.io/overall_weighting_calculator/.

of economically disadvantaged students in the school. Note that these score weights may not add up to 1.

Closing Gaps, when present, is always given a weight of 0.5.

Weights for Growth and Student Achievement are assigned following the guidelines in state statute, which balance Student Achievement and Growth according to the level of poverty in the school or district:

  a. If only one of Student Achievement or Growth is present, the Priority Area that is present is given a weight of 0.5.

  b. If both Student Achievement and Growth are present, their weights are determined using the following rules:

    i. For a school with 5% or fewer students who are economically disadvantaged, Student Achievement is given a weight of 0.9 and Growth is given a weight of 0.1.

    ii. For a school with 65% or more students who are economically disadvantaged, Student Achievement is given a weight of 0.1 and Growth is given a weight of 0.9.

    iii. For a school with between 5% and 65% students who are economically disadvantaged, the relative weights of Student Achievement and Growth are determined using the following formulas:[2]

$$\text{Student Achievement Weight} = 1 - \left(\left(\frac{4}{3} * \frac{\text{Percent Economically Disadvantaged}}{100} \right) + \frac{1}{30} \right)$$

$$\text{Growth Weight} = 1 - \text{Student Achievement Weight}$$

  c. Calculate the weighted average of these Priority Areas using the following formula:

$$\text{Average} = \frac{(\text{Achievement Score*Achievement Wt}) + (\text{Growth Score*Growth Wt}) + (\text{Closing Gaps Score*Closing Gaps Wt})}{\text{Sum of Weights}}$$

2. **Multiply the weighted average by the correct factor.** Next, multiply the weighted average calculated in Step 1 by a factor that is determined by which components of the On-Track and Postsecondary Readiness Priority Area are available for the school:

  a. If a school or district has *either* an attendance or graduation score *and* scores for either the ELA or mathematics academic achievement On-Track components, then the weighted average is multiplied by 3. In cases like this, the maximum score possible for the On-Track Priority Area is 100.

  b. If a school or district has *either* an attendance or graduation score, but no score for the ELA or mathematics achievement On-Track Priority Area components, then the

---

[2] DPI has produced an app to show how the weights of Student Achievement and Growth adjust based on the percentage of economically disadvantaged students: https://oea-dpi.shinyapps.io/variable_weighting_app_17/.

weighted average is multiplied by 3.2. In cases like this, the maximum score possible for the On-Track Priority Area is 80.

3. **Combine Result with On-Track and Postsecondary Readiness Scores.** The next step in creating the Overall Accountability Score is to sum the adjusted weighted average of the first three Priority Areas (calculated in step 2) and the On-Track and Postsecondary Readiness score, and then divide this sum by 4.

   Note that on the Report Card the On-Track and Postsecondary Readiness Area Score is presented on a scale where the maximum possible is 100. However, for schools where the On-Track and Postsecondary Area Score is based solely on the attendance or graduation components, the score incorporated into the Overall Accountability Score has a maximum possible score of 80. Therefore, for such schools, the On-Track score listed on the Report Card must be multiplied by 0.80 to arrive at the Overall Accountability Score.

4. **Apply Student Engagement Indicator Deductions.** Finally, subtract any Student Engagement Indicator deductions, found on page 1 of the report card, from the weighted average Priority Areas score (from step 3) to arrive at the Overall Accountability Score. The maximum possible deduction is 10 points for a school that misses both Student Engagement goals. (See Overall Accountability Score Walkthrough, pg. 12.)

The Overall Accountability Score determines which Accountability Rating Category a school falls into. Each Accountability Rating Category corresponds to a number of stars.

Accountability Rating Category	Accountability Score Range	
	Minimum	Maximum
Significantly Exceeds Expectations – ★★★★★	83	100
Exceeds Expectations – ★★★★☆	73	82.9
Meets Expectations – ★★★☆☆	63	72.9
Meets Few Expectations – ★★☆☆☆	53	62.9
Fails to Meet Expectations – ★☆☆☆☆	0	52.9

Exceptions

An Overall Accountability Score cannot be calculated for schools in the following situations:

- Schools with fewer than 20 full academic year (FAY) students enrolled in WSAS tested grades (Grades 3-8, and 11)
- Schools without tested grades (e.g. K4-2 schools)
- Schools exclusively serving at-risk students
- New schools (those with only one year of data)

In 2011-12 and 2012-13 public schools in these circumstances were given a score of NA and a rating of Not Rated. Beginning in 2013-14 these schools were scored based on the Alternate Accountability process and received an AR rating of "*Alternate Rating - Satisfactory Progress*" or "*Alternate Rating - Needs Improvement*" based on a district-supervised self-evaluation process. More information about Alternate Accountability can be found online: http://dpi.wi.gov/accountability/alternate-accountability.

If a Choice school does not meet the requirements for calculating an Overall Accountability Score, it is assigned a rating of "NR-DATA." This rating applies to the following three scenarios:

1. The school submitted insufficient Choice enrollment data, inhibiting the ability to produce an Overall Score.
2. The school had less than 20 students, thereby not meeting the cell size requirement to produce an Overall Score.
3. The school submitted data for only one of the two years required for producing a score. This applies to new Choice schools and Choice schools switching opt-in statuses for the Private School-All Students Report Card.

Global Notes

- The Accountability Index has four Priority Areas and a set of Student Engagement Indicators. Within each Priority Area, individual components are calculated. Example: Student Achievement is a Priority Area; English Language Arts (ELA) Achievement and Mathematics Achievement are two components of this Priority Area, each calculated separately.
- All scores are calculated and reported to one-tenth of a point.
- Calculations are rounded to the third decimal point (0.001, or 0.1%). The only exception is Percent Economically Disadvantaged, which is rounded to the nearest whole percentage point. Rounding is done at two stages in the calculation process: first, when individual student data are aggregated into a rate or average, and second, at the end of a sequence of algebraic operations.
- DPI uses a cell size, the minimum number of students needed to calculate a data component, of 20 students (N=20). In most cases, the cell size is applied to each year of data separately. In the 3rd Grade English Language Arts and 8th Grade Mathematics achievement components of the On-Track and Postsecondary Readiness Priority Area and in the Student Engagement Indicators, the cell size is applied to the two most recent years of data combined. In other words, if a school meets cell size by combining the two most recent years, but wouldn't if not combined, the data from the two most recent used are used in the calculation. This is done so as to provide a score for as many schools as possible.
- State level comparisons are provided on the front page of the Report Card, based on average state scores from the grade band that most closely matches the school. There are six grade bands for which state average scores are calculated: K-5, 6-8, 9-12, K-8, 6-12, and K-12. Comparison scores treat all Wisconsin students within a particular grade band as if they were one giant school. These scores are calculated using the same methodology as individual school scores. Comparisons are not used to determine a school's score or rating category; they are provided for context only.
- Graduation, attendance, and absenteeism data are from the prior year, not the current year, due to data availability. For example, the most recent graduation, attendance, and absenteeism data used in 2016-17 report cards are from the 2015-16 school year.
- Multiple years of data are considered throughout the Report Card:
  - Student Achievement requires a minimum of one and a maximum of three years of data
  - Growth requires two consecutive years of assessment data per student included in the calculation
  - Closing Achievement Gaps requires a minimum of three years of assessment data and a maximum of five years of data per student subgroup; Closing Graduation gaps requires a minimum of three years of graduation data and a maximum of five years of data per student subgroup

- o The Student Engagement Indicators consider both a current year rates and a multi-year rate.

- Whether a student attended a school for the Full Academic Year (FAY) is determined differently at the school and district levels. For school report cards, FAY determination is based on FAY for the school, not the district; for district report cards, FAY determination is based on FAY for the district, not the school. For past and current definitions of FAY, please visit: http://dpi.wi.gov/wisedash/help/glossary.

- Whether a student has school FAY status factors into whether he or she is included in report card calculations, as certain Priority Areas and Student Engagement Indicators are meant to capture school performance for students who attend all year. The following table shows when school FAY status determines whether a student is included in a calculation:

School FAY Students Only	All Students (FAY and not FAY)
Student Achievement	On-Track and Postsecondary Readiness: Graduation Rate
Growth	On-Track and Postsecondary Readiness: Attendance Rate
Closing Gaps	Absenteeism Rate
On-Track and Postsecondary Readiness: 3rd Grade English Language Arts Achievement	Dropout Rate
On-Track and Postsecondary Readiness: 8th Grade Mathematics Achievement	
School Information box	

- Two mobility rates are included on the front page of the district report cards: Within District Mobility and Between District Mobility. Within-district mobility is measured as the percentage of students who were FAY in the district but not FAY in a school within the district. Between-district mobility is measured as the percentage of students who were not FAY in the district.

Overall Accountability Score Walkthroughs

To give the user an idea of how these principles play out in practice, this guide provides a number of walkthroughs to demonstrate how the calculations work.

Below are three such walkthroughs using hypothetical school examples to show how the Overall Accountability Score is calculated and how those calculations may vary depending on school type (i.e. elementary, middle, or high school) and how many Priority Areas or score components are available for the school.

Overall Accountability Walkthrough #1

Sample Elementary School has the following Priority Area scores, and an economically disadvantaged student percentage of 20%:

Priority Area or Component	Score/Possible
Student Achievement	71.7 / 100
Growth	59.0 / 100
Closing Gaps	62.4 / 100
On-Track and Postsecondary Readiness	
Attendance	77.6 / 80
3rd Grade English Language Arts	15.5 / 20
Student Engagement Indicators	No deductions

Step 1: Combine Student Achievement, Growth, and Closing Gaps

This school has scores calculated for all three of these Priority Areas. First, determine the weights for each of the three Priority Areas:

Closing Gaps always has a weight of 0.5 when it is present.

Student Achievement Weight (Wt) =

$$1 - \left(\left(\frac{4}{3} * \frac{\text{Percent Economically disadvantaged}}{100}\right) + \frac{1}{30}\right) = 1 - \left(\left(\frac{4}{3} * \frac{20}{100}\right) + \frac{1}{30}\right) = 1 - 0.3$$
$$= 0.7$$

Growth Weight (Wt) =

$$1 - \text{Student Achievement Weight} = 1 - 0.7 = 0.3$$

$$\text{Average} = \frac{(\text{Achievement Score*Achievement Wt}) + (\text{Growth Score*Growth Wt}) + (\text{Closing Gaps Score*Closing Gaps Wt})}{\text{Sum of Weights}}$$

$$\text{Average} = \frac{(71.7 * 0.7) + (59.0 * 0.3) + (62.4 * 0.5)}{1.5} = 66.1$$

Step 2: Multiply the weighted average by the correct factor, determined by the number of On-Track components available

The school also has *either* an attendance or graduation score *and* scores for another On-Track component, so the weighted average is multiplied by 3.

$$\text{Average} * 3 = 66.1 * 3 = \mathbf{198.3}$$

Step 3: Combine Result with On-Track and Postsecondary Readiness Scores

Weighted Average Priority Areas Score

$$= \frac{(\text{Average} * 3) + (\text{Attendance Score} + \text{Other On-Track Scores})}{4}$$

$$\text{Weighted Average Priority Areas Score} = \frac{198.3 + (77.6 + 15.5)}{4} = \mathbf{72.9}$$

Step 4: Apply Student Engagement Indicator Deductions

$$\text{Overall Accountability Score} = \text{Weighted Average of Priority Area Scores} - \text{Deductions}$$

$$\text{Overall Accountability Score} = 72.9 - 0 = \mathbf{72.9}$$

Sample Elementary School's Overall Accountability Score is 72.9. A score of 72.9 means Sample Elementary School gets an Overall Accountability Rating of 3 stars—Meets Expectations.

Overall Accountability Score Walkthrough #2

Example High School has the following Priority Area scores:

Priority Area or Component	Score/Possible
Student Achievement	56.9 / 100
Closing Gaps	68.2 / 100
On-Track and Postsecondary Readiness	
Graduation	86 / 100
Student Engagement Indicator Deductions	-5 for Absenteeism

It does not have a Growth score because there is only one tested grade, 11th, in the school.

Step 1: Combine Student Achievement, Growth, and Closing Gaps

This school has scores calculated for the Student Achievement and Closing Gaps priority areas. First, determine the weights for each of the Priority Areas:

Closing Gaps always has a weight of 0.5 when it is present.

When only Student Achievement is present, the Priority Area that is present is given a weight of 0.5.

Average

$$= \frac{(\text{Student Achievement Score} * \text{Student Achievement Weight}) + (\text{Closing Gaps Score} * \text{Closing Gaps Weight})}{\text{Sum of Weights}}$$

$$\text{Average} = \frac{(56.9*0.5) + (68.2*0.5)}{1} = 62.6$$

Step 2: Multiply the weighted average by the correct factor, determined by the number of On-Track components available

The school also has an attendance or graduation score but no scores for other On-Track components, so this average is multiplied by 3.2.

$$\text{Average} * 3.2 = 62.6 * 3.2 = \mathbf{200.2}$$

Step 3: Combine Result with On-Track and Postsecondary Readiness Scores

The school has a maximum graduation score of 100 and no other On-Track and Postsecondary Readiness components, so this score is multiplied by 0.8.

$$\text{Graduation Score} * 0.8 = 86 * 0.8 = \mathbf{68.8}$$

$$\text{Weighted Average Priority Areas Score} = \frac{(\text{Average} * 3.2) + (\text{Graduation Score} * 0.8)}{4}$$

$$\text{Weighted Average Priority Areas Score} = \frac{200.2 + 68.8}{4} = \mathbf{67.3}$$

Step 4: Apply Student Engagement Indicator Deductions

$$\text{Overall Accountability Score} = \text{Weighted Average Priority Areas Score} - \text{Deductions}$$

$$\text{Overall Accountability Score} = 67.3 - 5 = \mathbf{62.3}$$

Example High School's Overall Accountability Score is 62.3, putting it into the **Meets Few Expectations** category.

Overall Accountability Score Walkthrough #3

Rural Middle School has the following Priority Area scores, and an economically disadvantaged percent of 35%:

Priority Area or Component	Score/Possible
Student Achievement	86.2 / 100
Growth	54.0 / 100
On-Track and Postsecondary Readiness	
Attendance	97.4 / 100
Student Engagement Indicator Deductions	No deductions

It does not have a Closing Gaps score because it is small and none of its student groups have at least 20 students. It does not have any On-Track and Postsecondary Readiness component scores beyond attendance because it is a grades 4-6 school (and thus has no 3rd grade English language arts or 8th grade mathematics data). In this case, where the school has only attendance, we have to transform the attendance score from being out of 100 points to being out of 80 points (as for schools with other components of their On-Track and Postsecondary Readiness scores).

Step 1: Combine Student Achievement, Growth, and Closing Gaps

This school has scores calculated for the Student Achievement and Growth Priority Areas. First, determine the weights for each of the Priority Areas:

Student Achievement Weight =

$$1 - \left(\left(\frac{4}{3} * \frac{\text{Percent Economically disadvantaged}}{100}\right) + \frac{1}{30}\right) = 1 - \left(\left(\frac{4}{3} * \frac{35}{100}\right) + \frac{1}{30}\right) = 1 - 0.5$$
$$= 0.5$$

Growth Weight =

$$1 - \text{Student Achievement Weight} = 1 - 0.5 = 0.5$$

$$\text{Average} = \frac{(\text{Student Achievement Score} * \text{Student Achievement Weight} + (\text{Growth Score} * \text{Growth Weight})}{\text{Sum of Weights}}$$

$$\text{Average} = \frac{(86.2 * 0.5) + (54.0 * 0.5)}{1} = 70.1$$

Step 2: Multiply the weighted average by the correct factor, determined by the number of On-Track components available

The school has an attendance score but no scores for other On-Track components, so this average is multiplied by 3.2.

$$\text{Average} * 3.2 = 70.1 * 3.2 = \mathbf{224.3}$$

Step 3: Combine Result with On-Track and Postsecondary Readiness Scores

The school has a maximum attendance score of 100 and no other On-Track and Postsecondary Readiness components, so this score is multiplied by 0.8.

$$\text{Attendance Score} * 0.8 = 97.4 * 0.8 = \mathbf{77.9}$$

$$\text{Weighted Average Priority Areas Score} = \frac{(\text{Average} * 3.2) + (\text{Attendance Score} * 0.8)}{4}$$

$$\text{Weighted Average Priority Areas Score} = \frac{224.3 + 77.9}{4} = \mathbf{75.6}$$

Step 4: Apply Student Engagement Indicator Deductions

$$\text{Overall Accountability Score} = \text{Weighted Average Priority Areas Score} - \text{Deductions}$$

$$\text{Overall Accountability Score} = 75.6 - 0 = \mathbf{75.6}$$

Rural Middle School's Overall Accountability Score is 75.6, putting it into the **Exceeds Expectations** category.

Overall Accountability Score Worksheet

Introduction

This worksheet requires that you have calculated scores found in the School Report Card Detail for each of the four Priority Areas that apply to your school. Worksheets for calculating the Priority Areas scores are found later in this guide. The four priority areas that go into determining the Overall Accountability Score are:

- Student Achievement: score out of 100 points
- Growth: score out of 100 points
- Closing Gaps: score out of 100 points
- On-Track and Postsecondary Readiness: score out of 100 points

It also requires that you have data on which Student Engagement Indicator deductions, if any, are applied to your school. Once you have calculated the Overall Accountability Score, use it to determine the accountability rating.

Accountability Rating Category	*Accountability Score Range*	
	Minimum	*Maximum*
Significantly Exceeds Expectations – ★★★★★	83	100
Exceeds Expectations – ★★★★☆	73	82.9
Meets Expectations – ★★★☆☆	63	72.9
Meets Few Expectations – ★★☆☆☆	53	62.9
Fails to Meet Expectations – ★☆☆☆☆	0	52.9

Worksheet

Step 1: Combine Student Achievement, Growth, and Closing Gaps Priority Areas and Multiply by Correct Factor

Leave a box blank if there is no score to enter.

(1a) Enter the Student Achievement score, if applicable | 1a

(1b) Enter the Growth score, if applicable | 1b

(1c) Enter the Closing Gaps score, if applicable | 1c

(1d) Is 1b blank? 1d ☐ Yes ☐ No If "Yes," skip to 1j.

(1e) Enter the economically disadvantaged percent | 1e

(1f) Divide 1e by 100 | 1f

(1g) Multiply 1f by 4/3 | 1g

(1h) Add 1/30 to 1g | 1h

(1i) Subtract 1h from 1 | 1i

(1j) If 1d is "Yes," enter '0.5' in 1j; otherwise enter '0' in 1j | 1j

(1k) If 1c is present, enter '0.5' in 1k; otherwise enter '0' in 1k | 1k

(1l) Sum 1h, 1i, 1j, 1k (where present) | 1l

(1m) Are 1h and 1i blank? ☐ Yes ☐ No If "Yes," skip to 1p.

(1n) Multiply 1a by 1i | 1n

(1o) Multiply 1b by 1h

| | 1o | |

(1p) If 1n and 1o are present, enter '0' in 1p; otherwise multiply 1a by 1j

| | 1p | |

(1q) If 1c is present, multiply 1c by 1k; otherwise enter '0' in 1q

| | 1q | |

(1r) Sum 1n, 1o, 1p, 1q (where present)

| | 1r | |

Weighted Average: (1s) Divide 1r by 1l

| | 1s | |

Step 2: Combine Result with On-Track and Postsecondary Readiness Priority Area

Leave a box blank if there is no score to enter.

(2a) Enter the Attendance or Graduation score, or their sum if both are present

| | 2a | |

(2b) If maximum score for Attendance or Graduation is 100, multiply 2a by 0.8; otherwise multiply 2a by 1.0.

| | 2b | |

(2c) Enter the 3rd Grade English Language Arts score, if applicable

| | 2c | |

(2d) Enter the 8th Grade Mathematics score, if applicable

| | 2d | |

(2e) Add 2b through 2d for On-Track score

| | 2e | |

(2f) Enter the value from 1s in Step 1

| | 2f | |

(2g) If 2c and 2d are *both* blank, enter 3.2; otherwise enter 3

| | 2g | |

(2h) Multiply 2f by 2g

| | 2h | |

(2i) Add 2e and 2h

| | 2i | |

(2j) Weighted average Priority Areas Score: Divide 2i by 4

| | 2j | |

Step 3: Apply Student Engagement Indicator Deductions

(3a) Enter the Weighted average Priority Areas score from 2j in Step 2

| | 3a | |

(3b) Did the school's participation rate meet the goal (≥95%)?   ☐ Yes ☐ No

If "Yes", enter 0; if "No", enter the deduction amount listed on the report card (-5 or -10)

| | 3b | |

(3c) Did the school's dropout rate meet the goal (<6%)?   ☐ Yes ☐ No   If "No," enter -5

| | 3c | |

(3d) Did the school's absenteeism rate meet the goal (<13%)?   ☐ Yes ☐ No   If "No," enter -5

| | 3d | |

Overall Accountability Score: (3e) Add boxes 3a, 3b, 3c, and 3d

| | 3e | |

Calculating Priority Area Scores
Student Achievement Priority Area

The Student Achievement Priority Area is designed to show **how well the students in a school have learned the knowledge and skills they are supposed to attain**. DPI uses state assessment data over the past three years to build a score, with more recent years bearing more weight on the score. Student Achievement is a points-based measure that gives credit for proficiency at multiple performance levels, with higher levels of performance earning more points.

Background

The simplest way to measure student achievement with state assessment results is by the percentage of students scoring at or above the proficient level. Wisconsin state proficiency level definitions were developed through a detailed process involving educators and testing professionals, and designed to approximate the proficiency benchmarks of the National Assessment of Educational Progress (NAEP) test. Proficiency level definitions were created for each Wisconsin assessment in the state accountability system, including the Forward Exam, DLM, and the ACT, and the prior assessments – the Badger Exam, WKCE and WAA-SwD.

To ensure schools are treated fairly, the Student Achievement measure allows students to earn points for their school based on whether they are partially proficient (Basic), proficient, or perform beyond the proficiency threshold (Advanced). Schools earn 0 points for students who are at the Below Basic level.

- Advanced level: **1.5 points**
- Proficient level: **1 point**
- Basic level: **0.5 points**
- Below Basic level: **0 points**

The calculation also incorporates three years of data to account for variation in year-to-year results, weighting the most recent years more heavily.

Reading the Report Card Detail

To arrive at a Student Achievement score, separate component scores for ELA and mathematics are calculated first and then added together. Tables for ELA and mathematics in the student achievement section show the count of students scoring at each performance level over the last three years. Non-tested students and students with invalidated tests are not included in the Student Achievement calculations. Consider the following example data on ELA achievement for a sample school, which will be used throughout this section walkthrough below:

Sample Elementary	Student Achievement – English Language Arts										
		2014-15			2015-16			2016-17			
Performance Level	**Points Multiplier**	**Students**		**Points**	**Students**		**Points**	**Students**		**Points**
		Count	**Percent**		**Count**	**Percent**		**Count**	**Percent**	
Advanced	1.5	22	16.3%	33	22	17.2%	33	21	16.9%	31.5

Proficient	1	35	25.9%	35	34	26.6%	34	41	33.1%	41
Basic	0.5	37	27.4%	18.5	38	29.7%	19	33	26.6%	16.5
Below Basic	0	41	30.4%	0	34	26.6%	0	29	23.4%	0
Total Tested	-	135	100.0%	86.5	128	100.0%	86	124	100.0%	89

This table shows that 135 students with full academic year status were tested at this school in 2014-15, with 22 scoring Advanced, 35 scoring Proficient, 37 scoring Basic, and 41 scoring Below Basic. Counts for 2015-16 and 2016-17 are similarly displayed. This table also shows the percent of students scoring in each performance category in 2014-15, with 16.3% scoring Advanced, 25.9% scoring Proficient, 27.4% scoring Basic, and 30.4% scoring Below Basic. Percentages for 2015-16 and 2016-17 are similarly displayed. The points and points multipliers for each performance level are also displayed.

Student Achievement Walkthrough

This walkthrough guides the user through the calculation of a Student Achievement score for a single content component (ELA). To determine an overall Student Achievement score, the process is repeated for the other content component (mathematics), and the two component scores are added.

Throughout this walkthrough we use three terms to describe the year of data used in each step:

- "Prior Year 2" refers to the school year two academic years before the most recent year and is the left-most school year shown on the report card. In this example, it refers to 2014-15.
- "Prior Year 1" refers to the school year one academic year before the most recent year and is the center school year shown on the report card. In this example, it refers to 2015-16.
- "Current Year" refers to the most recent school year of data used in the report cards and is the right-most school year shown on the report card. In this example, it refers to 2016-17.

Step 1: Assign and Average Points

The first step is to assign points for performance levels attained on the content component and calculate the average points per student for each year. Students scoring Advanced are assigned 1.5 points each; students scoring Proficient, 1 point; and students scoring Basic, 0.5 points. Students scoring Below Basic are assigned zero points. These point values are multiplied by the number of students to determine the points awarded in each category. The points for each year are then added together and divided by the total number of students tested to determine an average. Each year's average is capped at a maximum of 1.

| Performance Level | Points Multiplier | 2014-15 | | | 2015-16 | | | 2016-17 | | |
| | | Students | | | Students | | | Students | | |
		Count	Percent	Points	Count	Percent	Points	Count	Percent	Points
Advanced	1.5	22	16.3%	33	22	17.2%	33	21	16.9%	31.5
Proficient	1	35	25.9%	35	34	26.6%	34	41	33.1%	41

Basic	0.5	37	27.4%	18.5	38	29.7%	19	33	26.6%	16.5
Below Basic	0	41	30.4%	0	34	26.6%	0	29	23.4%	0
Total Tested	-	135	100.0%	86.5	128	100.0%	86	124	100.0%	89

Calculation

Calculate proficiency points earned in Prior Year 2. Similar calculations are performed for Prior Year 1 and Current Year.

$$\text{Points} = \text{Points Multiplier} * \text{Count}$$

$$\text{Prior Year 2 Advanced Points} = 1.5 * 22 = 33$$

$$\text{Prior Year 2 Proficient Points} = 1 * 35 = 35$$

$$\text{Prior Year 2 Basic Points} = 0.5 * 37 = 18.5$$

$$\text{Prior Year 2 Below Basic Points} = 0 * 41 = 0$$

$$\text{Prior Year 2 Points} = 33 + 35 + 18.5 + 0 = 86.5$$

Calculate the average points per student for each year.

$$\text{Prior Year 2 Average} = \text{Prior Year 2 Points} / \text{Prior Year 2 Count}$$

$$\text{Prior Year 1 Average} = \text{Prior Year 1 Points} / \text{Prior Year 1 Count}$$

$$\text{Current Year Average} = \text{Current Year Points} / \text{Current Year Count}$$

$$\text{Prior Year 2 Average} = 86.5/135 = \mathbf{0.641}$$

$$\text{Prior Year 1 Average} = 86/128 = \mathbf{0.672}$$

$$\text{Current Year Average} = 89/124 = \mathbf{0.718}$$

Step 2: Calculate Annual Weights

Next, we calculate a weight for each year's average, which (1) weights more recent years more heavily, and (2) takes into account year-to-year fluctuations in numbers of students tested. These fluctuations are captured by comparing the number of students tested in a given year to the average number tested across three years of data. To do this, we calculate a weight that is the product of a "students tested weight"—that is, the number of students tested that year divided by the average tested across all three years—and a "year weight" that is higher for more recent years.

The values that go into each year's weight depend upon how many years of data are available that meet our cell size (minimum number of students with data) of 20:

- Three years available: "Year weights" are 1.5 for the current year, 1.25 for the prior year, and 1 for the year before that; the number of students tested is averaged across all three years.
- Two years available: "Year weights" are 1.5 for the current year and 1 for the prior year; the number of students tested is averaged across only the current and prior years.
- One year available: The current year weight is 1.

Formulas

Average Number Tested

$$= \frac{\text{Prior Year 2 Number Tested} + \text{Prior Year 1 Number Tested} + \text{Current Year Number Tested}}{\text{Number of Years Available}}$$

$$\text{Prior Year 2 Weight} = 1 * \frac{\text{Prior Year 2 Number Tested}}{\text{Average Number Tested}}$$

$$\text{Prior Year 1 Weight} = 1.25 * \frac{\text{Prior Year 1 Number Tested}}{\text{Average Number Tested}}$$

$$\text{Current Year Weight} = 1.5 * \frac{\text{Current Year Number Tested}}{\text{Average Number Tested}}$$

Calculation

$$\text{Prior Year 2 Weight} = 1 * \frac{135}{(135 + 128 + 124)/3} = \mathbf{1.047}$$

$$\text{Prior Year 1 Weight} = 1.25 * \frac{128}{(135 + 128 + 124)/3} = \mathbf{1.240}$$

$$\text{Current Year Weight} = 1.5 * \frac{124}{(135 + 128 + 124)/3} = \mathbf{1.442}$$

Step 3: Combine Points and Weights

In step three we multiply the average points determined in Step 1 by the weights calculated in Step 2.

Formulas

$$\text{Prior Year 2 Score} = \text{Prior Year 2 Average} * \text{Prior Year 2 Weight}$$

$$\text{Prior Year 1 Score} = \text{Prior Year 1 Average} * \text{Prior Year 1 Weight}$$

$$\text{Current Year Score} = \text{Current Year Average} * \text{Current Year Weight}$$

Calculation

$$\text{Prior Year 2 Score} = 0.641 * 1.047 = \mathbf{0.671}$$

$$\text{Prior Year 1 Score} = 0.672 * 1.240 = \mathbf{0.833}$$

$$\text{Current Year Score} = 0.718 * 1.442 = \mathbf{1.035}$$

Step 4: Calculate Content Component Score

The achievement score for this content area is calculated by adding the scores from Step 3, dividing the result by the sum of the weights determined in Step 2, and then multiplying the final value by 50. This createsa content area score out of 50 points, which, when combined with the other content component score, will sum to a total Priority Area score out of 100.

Formula

Content Area Achievement Score

$$= \frac{\text{Prior Year 2 Score} + \text{Prior Year 1 Score} + \text{Current Year Score}}{\text{Prior Year 2 Weight} + \text{Prior Year 1 Weight} + \text{Current Year Weight}} * 50$$

Calculation

$$\text{Content Area Achievement Score} = \frac{0.671 + 0.833 + 1.035}{1.047 + 1.240 + 1.442} * 50 = \mathbf{34.0}$$

This school's score for the ELA component of the Student Achievement Area Score is 34.0.

Student Achievement Priority Area Worksheet

Introduction

This worksheet has two parts, one for ELA and one for mathematics. Both parts require you to copy data from the Student Achievement detail page of the School Report Card Detail. Be sure to **use the counts, not the percentages**. Note that **the score calculated here may not exactly match the report card due to rounding differences**. Here is a key to the data needed to complete the worksheet:

Performance Level	Points Multiplier	2014-15 Students Count	2014-15 Students Percent	2014-15 Points	2015-16 Students Count	2015-16 Students Percent	2015-16 Points	2016-17 Students Count	2016-17 Students Percent	2016-17 Points
Advanced	1.5	22	16.3%	33	22	17.2%	33	21	16.9%	31.5
Proficient	1	35	25.9%	35	34	26.6%	34	41	33.1%	41
Basic	0.5	37	27.4%	18.5	38	29.7%	19	33	26.6%	16.5
Below Basic	0	41	30.4%	0	34	26.6%	0	29	23.4%	0
Total Tested	-	**A** 135	100.0% **B**	86.5 **C**	128	100.0% **D**	86 **E**	124	100.0% **F**	89

Letters shown on the key are used to help identify data on the worksheet. Tables for ELA and mathematics achievement have the same layout. In the worksheet, "Prior Year 2" is the left-most year shown (2014-15 in the key), "Prior Year 1" the center year shown (2015-16 in the key), and "Current Year" the right-most year shown (2016-17 in the key).

Instructions

Work through the individual ELA and mathematics worksheets step by step, entering data from the Report Card Detail where appropriate. When both are complete, add both content component scores in the space below to determine the school's score for the Student Achievement Priority Area:

       English Language Arts Achievement Score: _____ out of 50 points

+   **Mathematics Achievement Score:**   _____ out of 50 points

       Student Achievement Priority Area Score: _____ out of 100 points

ELA Achievement Worksheet

Step 1: Assign and Average Points

If a year does not have data shown, leave that year's boxes blank.

Prior Year 2 Average

(1a) Total points earned (B)　　　　　　　　　　　| 1a |

(1b) Count of tested students (A)　　　　　　　　| 1b |

(1c) Is 1a greater than 1b?　　　1c ☐ Yes ☐ No

Average: (1d) If 1c is "Yes," enter 1; if 1c is "No," divide 1a by 1b　　| 1d |

Prior Year 1 Average

(1e) Total points earned (D)　　　　　　　　　　　| 1e |

(1f) Count of tested students (C)　　　　　　　　| 1f |

(1g) Is 1e greater than 1f?　　　1g ☐ Yes ☐ No

Average: (1h) If 1g is "Yes," enter 1; if 1g is "No," divide 1e by 1f　　| 1h |

Current Year Average

(1i) Total points earned (F)　　　　　　　　　　　| 1i |

(1j) Count of tested students (E)　　　　　　　　| 1j |

(1k) Is 1i greater than 1j?　　　1k ☐ Yes ☐ No

Average: (1l) If 1k is "Yes," enter 1; if 1k is "No," divide 1i by 1j　　| 1l |

Step 2: Calculate Annual Weights

Average Number Tested

(2a) Prior Year 2 count of tested students (A) – leave blank if not shown　　| 2a |

(2b) Prior Year 1 count of tested students (C) – leave blank if not shown　　| 2b |

(2c) Current Year count of tested students (E)　　| 2c |

(2d) Add 2a through 2c　　| 2d |

(2e) How many of 2a through 2c have values?　　| 2e |

Average count of tested students: (2f) Divide 2d by 2e　　| 2f |

Prior Year 2 Weight

(2g) Is 2a blank?　　2g ☐ Yes ☐ No　　If "Yes," move on to the "Prior Year 1 Weight" section.

(2h) Enter the count from 2a　　| 2h |

(2i) Enter the average from 2f　　| 2i |

Prior Year 2 Weight: (2j) Divide 2h by 2i　　| 2j |

Prior Year 1 Weight

(2k) Is 2b blank?　　2k ☐ Yes ☐ No　　If "Yes," move on to the "Current Year Weight" section.

(2l) Enter the count from 2b　　| 2l |

(2m) Enter the average from 2f　　| 2m |

(2n) Divide 2l by 2m　　| 2n |

(2o) If 2g is "Yes," enter 1; if 2g is "No," enter 1.25　　| 2o |

Prior Year 1 Weight: (2p) Multiply 2n by 2o　　| 2p |

Current Year Weight

(2q) Are both 2a and 2b blank? 2q ☐ Yes ☐ No   If "Yes," skip to 2t.

(2r) Enter the count from 2c | 2r
(2s) Enter the average from 2f | 2s
(2t) Divide 2q by 2r | 2t
(2u) If 2q is "Yes," enter 1; if 2q is "No," enter 1.5 | 2u
Current Year Weight: (2v) Multiply 2s by 2t | 2v

Step 3: Combine Points and Weights

If a year does not have data, leave that year's boxes blank.

Prior Year 2 Score

(3a) Enter the average from 1d | 3a
(3b) Enter the weight from 2j | 3b
Prior Year 2 Score: (3c) Multiply 3a by 3b | 3c

Prior Year 1 Score

(3d) Enter the average from 1h | 3d
(3e) Enter the weight from 2p | 3e
Prior Year 1 Score: (3f) Multiply 3d by 3e | 3f

Current Year Score

(3g) Enter the average from 1l | 3g
(3h) Enter the weight from v | 3h
Current Score: (3i) Multiply 3g by 3h | 3i

Step 4: Calculate English Language Arts Achievement Score

(4a) Enter the score from 3c | 4a | (4e) Enter the weight from 2j | 4e
(4b) Enter the score from 3f | 4b | (4f) Enter the weight from 2p | 4f
(4c) Enter the score from 3i | 4c | (4g) Enter the weight from 2v | 4g
(4d) Add 4a through 4c | 4d | (4h) Add 4e through 4g | 4h
 | | (4i) Divide 4d by 4h | 4i
ELA Achievement Score: (4j) Multiply 4i by 50 | 4j

Mathematics Achievement Worksheet

Step 1: Assign and Average Points

If a year does not have data shown, leave that year's boxes blank.

Prior Year 2 Average

(1a) Total points earned (B)	1a
(1b) Count of tested students (A)	1b
(1c) Is 1a greater than 1b?	1c ☐ Yes ☐ No
Average: (1d) If 1c is "Yes," enter 1; if 1c is "No," divide 1a by 1b	1d

Prior Year 1 Average

(1e) Total points earned (D)	1e
(1f) Count of tested students (C)	1f
(1g) Is 1e greater than 1f?	1g ☐ Yes ☐ No
Average: (1h) If 1g is "Yes," enter 1; if 1g is "No," divide 1e by 1f	1h

Current Year Average

(1i) Total points earned (F)	1i
(1j) Count of tested students (E)	1j
(1k) Is 1i greater than 1j?	1k ☐ Yes ☐ No
Average: (1l) If 1k is "Yes," enter 1; if 1k is "No," divide 1i by 1j	1l

Step 2: Calculate Annual Weights

Average Number Tested

(2a) Prior Year 2 count of tested students (A) – leave blank if not shown	2a
(2b) Prior Year 1 count of tested students (C) – leave blank if not shown	2b
(2c) Current Year count of tested students (E)	2c
(2d) Add 2a through 2c	2d
(2e) How many of 2a through 2c have values?	2e
Average count of tested students: (2f) Divide 2d by 2e	2f

Prior Year 2 Weight

(2g) Is 2a blank?   2g ☐ Yes ☐ No   If "Yes," move on to the "Prior Year 1 Weight" section.

(2h) Enter the count from 2a	2h
(2i) Enter the average from 2f	2i
Prior Year 2 Weight: (2j) Divide 2h by 2i	2j

Prior Year 1 Weight

(2k) Is 2b blank?   2k ☐ Yes ☐ No   If "Yes," move on to the "Current Year Weight" section.

(2l) Enter the count from 2b	2l
(2m) Enter the average from 2f	2m
(2n) Divide 2l by 2m	2n
(2o) If 2g is "Yes," enter 1; if 2g is "No," enter 1.25	2o
Prior Year 1 Weight: (2p) Multiply 2n by 2o	2p

Current Year Weight

    (2q) Are both 2a and 2b blank?   2q ☐ Yes ☐ No   If "Yes," skip to 2t.

        (2r) Enter the count from 2c | 2r |

        (2s) Enter the average from 2f | 2s |

        (2t) Divide 2q by 2r | 2t |

        (2u) If 2q is "Yes," enter 1; if 2q is "No," enter 1.5 | 2u |

        Current Year Weight: (2v) Multiply 2s by 2t | 2v |

Step 3: Combine Points and Weights

If a year does not have data, leave that year's boxes blank.

Prior Year 2 Score

        (3a) Enter the average from 1d | 3a |

        (3b) Enter the weight from 2j | 3b |

        Prior Year 2 Score: (3c) Multiply 3a by 3b | 3c |

Prior Year 1 Score

        (3d) Enter the average from 1h | 3d |

        (3e) Enter the weight from 2p | 3e |

        Prior Year 1 Score: (3f) Multiply 3d by 3e | 3f |

Current Year Score

        (3g) Enter the average from 1l | 3g |

        (3h) Enter the weight from 2v | 3h |

        Current Score: (3i) Multiply 3g by 3h | 3i |

Step 4: Calculate Mathematics Achievement Score

(4a) Enter the score from 3c	4a	(4e) Enter the weight from 2j	4e
(4b) Enter the score from 3f	4b	(4f) Enter the weight from 2p	4f
(4c) Enter the score from 3i	4c	(4g) Enter the weight from 2v	4g
(4d) Add 4a through 4c	4d	(4h) Add 4e through 4g	4h
		(4i) Divide 4d by 4h	4i
		Mathematics Achievement Score: (4j) Multiply 4i by 50	4j

Calculating Priority Area Scores
Growth Priority Area

The Growth Priority Area evaluates schools on their **students' growth over time compared to the growth of similar students in other Wisconsin schools.** This measure is designed to provide information on how well schools are contributing to the continued progress of all of their students, regardless of prior achievement level, as opposed to focusing attention on a smaller subset who may be just below proficiency, very low-performing, or very high-performing.

Note that the Growth Priority Area is calculated separately for schools and districts; district Growth scores are not a simple average of school Growth scores (see below). This Priority Area is labeled as "School Growth" on school report cards and as "District Growth" on district report cards. For simplicity, the report card documentation refers to this Priority Area collectively as "Growth," distinguishing between "School Growth" and "District Growth" when appropriate. Additionally, on the Private School – Choice Students Report Card, the School Growth Priority Area *only applies* to students attending under the Choice program, not all students in the school.

Background

At the foundation of the Growth score is a statistical technique known as value-added, which is used in many states and districts as a measure of school performance. There are different types of value-added measures, each with different technical properties. Value-added measures belong to a class of statistical models that quantify how much growth students make over time after applying statistical controls for factors that are generally beyond a school's control but may influence how much growth students make. These include factors such as students' prior achievement and certain characteristics about the students themselves, such as whether they come from families with lower income levels or have a disability and/or limited English proficiency.
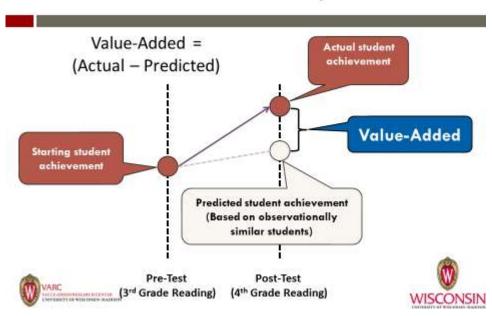

The purpose of statistically controlling for prior achievement and other student attributes is *not* to establish lowered expectations for some students' performance – since high expectations are already reinforced and rewarded through the Student Achievement Priority Area – but rather to recognize the fact that schools often differ substantially with respect to the kinds of students they serve. Some schools' enrollments are comprised largely of students from more affluent families and communities who often enter school with higher levels of achievement and school readiness, while others have higher concentrations of students who begin schooling with lower levels of readiness. Research accumulated across many years affirms that these kinds of factors often influence the rate at which students grow. It therefore makes sense to include in the report cards not just measures of how well students are performing in an absolute, point-in-time (Student Achievement), but also the rate at which all students, regardless of prior achievement level and background, are growing over time (Growth).

While the calculations behind value-added are complex, the concept is fairly straightforward. Value-added, simply put, is the difference between the *actual* and *predicted* growth over time of students who are "observationally similar." Similar students are determined by prior achievement and a selected set of characteristics about the students themselves that are generally beyond a school's control yet may influence students' growth over time. In addition to prior achievement, the value-added model used in

the Accountability Report Cards (developed at the University of Wisconsin-Madison)[3] includes statistical controls for students' family income status (as measured by free/reduced lunch eligibility), disability status, English language proficiency level, gender, and race/ethnicity. The objective is to facilitate "apples to apples" comparisons between schools that often serve very different student populations, and to include growth across the entire spectrum of student performance, rather than just a subset that moves across proficiency levels.

Value-added starts with one (or more, if available) pre-test scores (such as a 3rd grade ELA score), which are used (in conjunction with student attributes such as family income) to generate predictions based on historical data of how much growth students are likely to make. As soon as a second (post-test) score, such as a 4th grade ELA score, becomes available, the actual scores of students within a school are compared to their predicted scores. If, collectively, the school's actual scores are higher than predicted scores, we call this "high value-added" (meaning that the school produced more growth than schools which serve similar student populations), as depicted below:

In addition to applying statistical controls for students' prior achievement and selected attributes such as family income, the value-added model also includes a statistical correction for measurement error, a common issue in standardized assessments. Measurement error refers to the idea that students' scores on a single administration of a standardized test are not a perfect measure of their true knowledge and ability, and may differ if the same student were to take the same test again. Such variation in scores is especially common among students with very low or very high scores, but can be statistically adjusted

---

[3] Additional information on the Wisconsin value-added model is available at http://dpi.wi.gov/accountability/report-cards, http://dpi.wi.gov/accountability/growth, and at http://varc.wceruw.org/what-we-do/professional-development.aspx.

for in the pre-test score to help ensure that schools with large number of low or high-performing students are not penalized in the Growth measure.

District and school calculations differ

The statistical calculation of school value-added differs from district value-added. A District Growth score is not simply an average of the School Growth scores of its schools. Rather, a district is treated as one big school made up of all students in the district.[3] This distinction is important to keep in mind when comparing a District Growth score with the scores of its schools. However, it does not affect the calculations in the walkthrough and worksheet in this section.

Reading the Report Card Detail

To arrive at a Growth score, separate value-added component scores for ELA and mathematics are calculated first and reported from UW-Madison to DPI. These value-added scores generally range from 1 to 5, in which a score of 3 is average. While rare, a value-added score can extend below 1 or above 5 when growth is much higher or lower than expected. DPI then converts these scores to Growth scores on a 0- to 100-point scale. The separate component scores are then added together. A table for ELA and mathematics in the Growth section shows the count of students included in Growth calculations and their average value-added score. Consider the following example data on growth for a sample school, which will be used throughout this section walkthrough:

Group	English Language Arts		Mathematics	
	Count	Value-Added Score	Count	Value-Added Score
All Students: School	156	3.0	156	4.1

This table shows that 156 students were included in value-added calculations in 2016-17, with a weighted average value-added score of 3.0 for English language arts and a weighted average value-added score of 4.1 for mathematics. Two years of value-added results are used, when available, in calculating the weighted average value-added scores. As in other parts of the report card, the current year is weighted more heavily than prior years' data.

Growth Walkthrough

This walkthrough guides the user through the calculation of a Growth score.

Step 1: Determine the Growth Score

First we use a formula to determine the Growth score and put Growth scores on a similar scale to Student Achievement.

Formula

$$\text{Growth Score} = [(\text{Value-Added Score} * 0.19) + 0.09] * \text{Possible Points}$$

Note: 0.19 and 0.09 are numbers that align Growth to a scale based on Student Achievement scores. These numbers were determined from a statistical norming of the Student Achievement, Growth, and Closing Gaps Priority Areas.

Calculation

$$\text{Growth Score} = [(3.0 * 0.19) + 0.09] * 50 = \mathbf{33.0}$$

Sample Elementary has a **Growth** score in English language arts of **33.0**.

Growth Priority Area Worksheet

This worksheet has two parts: English Language Arts Growth and Mathematics Growth. Each part requires you to pull data from the Growth detail page in the School Report Card Detail. **Note that the score calculated here may not exactly match the report card due to rounding differences**.

Instructions

Complete the worksheets that include components calculated for the school, entering data from the School Report Card Detail where appropriate. When all applicable worksheets are complete, add the component scores in the space below to determine the school's total Growth score:

	English Language Arts Growth Score:	_____ out of 50 points
+	**Mathematics Growth Score:**	_____ out of50 points
	Growth Priority Area Score:	_____ out of 100 points

Growth Worksheet

Step 1: Determine the ELA Growth Score

Enter data from the English Language Arts "Value-Added Score" column and the Mathematics "Value-Added Score" column.

(1a) Enter the English language arts value-added score:

(1b) Multiply 1a by 0.19:

(1c) Add 1b to 0.09:

(1d) **English Language Arts Growth Score** Multiply 1c by 50 possible points:

(2a) Enter the mathematics value-added score:

(2b) Multiply 2a by 0.19:

(2c) Add 2b to 0.09:

(2d) **Mathematics Growth Score** Multiply 2c by 50 possible points:

(3a) **Growth Score** Add 1d and 2d:

1a	
1b	
1c	
1d	
2a	
2b	
2c	
2d	
3a	

Step 1: Determine the ELA Growth Score

Calculating Priority Area Scores
Closing Gaps Priority Area

The Closing Gaps Priority Area evaluates schools based on the **rate of change in student achievement and graduation over time among key student groups**. It focuses on student groups with statewide achievement gaps, and rewards schools that improve these groups' performance at a rate greater than their statewide comparison group, closing Wisconsin's achievement and graduation gaps.

Background

Wisconsin has a number of specific and significant gaps in ELA and mathematics achievement and in graduation. The Closing Gaps Priority Area is designed to **look at improvement among particular student groups** in a way that **rewards schools for contributing to closing these gaps**. We evaluate schools' progress in closing achievement gaps using the points-based proficiency rate also used in the Student Achievement Priority Area, and we evaluate schools' progress in closing graduation gaps using high school cohort graduation rates. For each of these components, we examine the change in the points-based proficiency or graduation rate over a number of years (up to a maximum of five years). Then, each school's average rate of change for a subgroup is contrasted with a statewide comparison group's average rate of change over the same time period. The statewide comparison group consists of public school students, Choice students, and private school students in schools that have opted in to receiving a Private School – All Students Report Card. This is done by comparing the trend lines of the two groups. The school target groups and statewide comparison groups included in Closing Gaps scores are:

School Target Group	Statewide Comparison Group
American Indian or Alaskan Native	White
Asian	
Black or African American	
Hispanic/Latino	
Native Hawaiian or other Pacific Islander	
Two or more races	
Students with disabilities	Students without disabilities
Economically disadvantaged	Not economically disadvantaged
English language learners	English proficient
Supergroup*	Not in supergroup*

*Definition of supergroup detailed below.

Supergroups

If a school or district's subgroups do not meet the cell size requirement to be considered in its Closing Gaps score (i.e., fewer than 20 students), a **supergroup** is formed by combining at least two of the following three student groups that are not defined according to racial or ethnic identity: students with disabilities (SwD), economically disadvantaged students (ECD), or English language learners (LEP). Thus, there are four possible supergroups: the "SwD-ECD" supergroup, "SwD-LEP" supergroup, "ECD-LEP" supergroup, and "All 3" supergroup.

We use a supergroup only when these individual groups do not have enough students to be considered in a school's Closing Gaps score (i.e., fewer than 20 students), but when combined into the supergroup, they do. Supergroups are compared to the statewide group of students who would not meet any of the conditions for being in the particular supergroup. Students are not counted more than once in a single supergroup.

For example, in a school with 14 students with disabilities and 16 economically disadvantaged students, there are too few students in either group to be considered in Closing Gaps. However, if there are 25 students in the "students with disabilities/economically disadvantaged" supergroup (9 with disabilities, 11 economically disadvantaged, and 5 in both groups), then we can consider all of those students together in the supergroup. This supergroup would be compared to students statewide who are without disabilities and are not economically disadvantaged.

Reading the Report Card Detail

All of the Closing Gaps measures are based on comparisons between specific groups of students in the school and their peers in a statewide comparison group. The Closing Gaps score is based on student subgroups, not the "all students" group:

- For racial/ethnic groups, we compare each targeted racial/ethnic group--American Indian or Alaskan Native, Asian, Black or African American, Hispanic/Latino, Native Hawaiian or other Pacific Islander, and two or more race students--to their White student counterparts across the state.
- For the students with disabilities, economically disadvantaged, and English language learner groups,-- we compare the students within the group at the school level to those outside of it at the state level. A student may be counted in more than one of these groups.
- For supergroups (groups combining two or three groups outside of racial/ethnic group, used only when those individual groups do not have enough students for comparison but the supergroup does), we compare the students within the supergroup to students statewide who do not meet any of the requirements for being in the supergroup. A student belonging to more than one of the combined groups is only counted once in the supergroup.
- If a school has a very high performing subgroup, the subgroup is rewarded with the highest change score achieved by the subgroup in any school in the state. This accounts for the fact that schools with a high performing group have less room for growth from one year to the next, so assigning them the highest score in the state ensures they are not unfairly penalized.
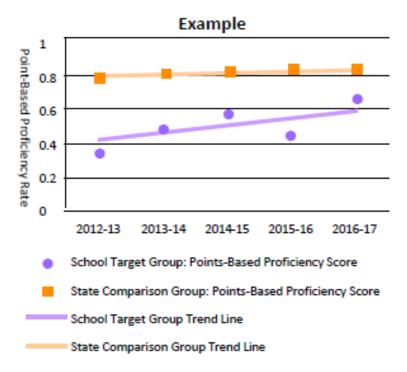

DPI requires a minimum of 20 students in a subgroup per year for a minimum of three years to complete Closing Gaps calculations. In other words, at a minimum, a school's subgroup must have achievement or graduation data for the current year and the two most recent years to be included in the calculation. A school must have at least one subgroup or supergroup that meets these requirements in order to have a Closing Gaps score. "NA" is reported when subgroups do not meet the minimum number of students for the minimum number of years.

The Closing Gaps data in the School Report Card Detail includes summary tables for Closing Achievement Gaps (one for English language arts and one for mathematics) and Closing Graduation Gaps (one for the four-year cohort graduation rate and one for the six-year cohort graduation rate). For Closing Achievement Gaps, each table includes five points-based proficiency rate columns, representing the five most recent years and labeled "Points," for both the school target groups and the state comparison groups. Points-based proficiency is calculated using the same method as is used for the Student Achievement Priority Area. The Closing Graduation Gaps tables are similar but show graduation rates in place of points-based proficiency rates.

Consider the following example table for Closing Achievement Gaps:

School Target Group Points-Based Proficiency Rates						State Comparison Group Points-Based Proficiency Rates							Rate of Change		
Group	2012-13 Points	2013-14 Points	2014-15 Points	2015-16 Points	2016-17 Points	Group	2012-13 Points	2013-14 Points	2014-15 Points	2015-16 Points	2016-17 Points	School Target Group	State Comparison Group	Difference in Rate of Change
Example School Target Group	0.351	0.480	0.593	0.452	0.678	Example State Comparison Group	0.793	0.811	0.825	0.843	0.846	0.201	0.050	0.151

Each points-based proficiency column is treated as a point on a scatterplot. A line of best fit is drawn through these points to create a trend line that gives more weight to years with more tested students. The slope of this line is a group's Rate of Change, representing the progress made by the group over time. Rates of change may be positive or negative, depending on whether a group's achievement scores or graduation rate are improving over time. Rate of Change values closer to 0 suggest little change over time, while those farther from 0 indicate more change. Finally, the table includes a column for the Difference in Rate of Change, showing the difference in the Rate of Change between the target group and the comparison group. A positive number means that the gap is decreasing (i.e., the Rate of Change of the target group is higher than that of the comparison group); a negative number means that the gap is increasing.

The Report Card Detail contains four tables (Closing Achievement Gaps – English Language Arts, Closing Achievement Gaps – Mathematics, Closing Graduation Gaps – Four Year, Closing Graduation Gaps – Six Year) that contain one row per target group. Below are example tables for Closing Achievement Gaps – English Language Arts and Closing Graduation Gaps – Four Year:

Closing Achievement Gaps - English Language Arts | Score: 30.8/50

School Target Group Points-Based Proficiency Rates						State Comparison Group Points-Based Proficiency Rates						Rate of Change		
Group	2012-13 Points	2013-14 Points	2014-15 Points	2015-16 Points	2016-17 Points	Group	2012-13 Points	2013-14 Points	2014-15 Points	2015-16 Points	2016-17 Points	School Target Group	State Comparison Group	Difference in Rate of Change

Closing Gaps Walkthrough

This walkthrough guides the user through calculation of a Closing Achievement Gaps score in ELA for Sample Elementary. It also includes a shorter description of a Closing Graduation Gaps determination for Sample High, illustrating how graduation differs in this Priority Area. To determine an overall Closing Gaps score, ELA, mathematics, and graduation scores are calculated as applicable and added.

English Language Arts Achievement Gaps Example

Step 1: Calculate the Difference in Rates of Change for Each Target Group-Comparison Pair

Closing Achievement Gaps calculations are based on achievement performance level points like those of the Student Achievement Priority Area. Please note, if the school (or district) subgroup's average points-based proficiency rate is greater than or equal to 0.9, the change score is adjusted to be equal to the highest change score observed for that subgroup at any school (or district) in the state. This is indicated on the report cards by the symbol "!". This adjustment ensures that schools with very high achievement are not penalized with low Closing Gaps scores for small increases in gaps.

The first step in determining a Closing Achievement Gaps score is to subtract the state comparison group Rate of Change from the school target group Rate of Change for each student subgroup to determine that subgroup's Difference in Rate of Change:

> Difference in Rate of Change
> = School Target Group Rate of Change - State Comparison Group Rate of Change

We will step through the process to illustrate using Sample Elementary School's data.

Sample Elementary – English Language Arts Achievement

Closing Achievement Gaps - English Language Arts | Score: 32.6/50

Group (School Target Group Points-Based Proficiency Rates)	2012-13 Points	2013-14 Points	2014-15 Points	2015-16 Points	2016-17 Points	Group (State Comparison Group Points-Based Proficiency Rates)	2012-13 Points	2013-14 Points	2014-15 Points	2015-16 Points	2016-17 Points	School Target Group (Rate of Change)	State Comparison Group (Rate of Change)	Difference in Rate of Change
American Indian or Alaskan Native	0.433	0.468	0.513	0.446	0.435	White	0.657	0.658	0.826	0.723	0.741	-0.002	0.023	-0.025

Difference in Rate of Change
= School Target Group Rate of Change - State Comparison Group Rate of Change

The Rate of Change calculations for Sample Elementary are below:

Amer Indian students: Difference in Rate of Change $= -0.002 - 0.023 = -0.025$
Asian students: Difference in Rate of Change $= 0.031 - 0.023 = 0.008$
Black students: Difference in Rate of Change $= -0.006 - 0.023 = -0.029$
Hispanic students: Difference in Rate of Change $= 0.019 - 0.023 = -0.004$
Two or More Races students: Difference in Rate of Change $= -0.055 - (-0.043) = -0.012$
Students with Disabilities: Difference in Rate of Change $= 0.019 - 0.021 = -0.002$
Economically Disadvantaged students: Difference in Rate of Change $= 0.006 - 0.022 = -0.016$
Limited English Proficient students: Difference in Rate of Change $= -0.010 - 0.018 = -0.028$

Step 2: Determine the Closing Achievement Gaps Score

Once we have a Difference in Rate of Change for each group-comparison pair in the school, we average those scores together and use a formula to determine the Closing Achievement Gaps score, in order to put Closing Gaps scores on a similar scale to Student Achievement.

Definitions

Average Difference in Rate of Change
= Average of all "Difference in Rate of Change" values calculated for the school

Possible Points
= 25 points each for ELA and mathematics if the school has Closing Graduation Gaps data

or 50 each if it does not

Formula

Closing Achievement Gaps Score
= [(Average Difference in Rate of Change $* 4.77) + 0.72] *$ Possible Points

Note: 4.77 and -0.72 are numbers that align Closing Gaps to a scale based on Student Achievement scores. These numbers were determined from statistical norming of the Student Achievement, Growth, and Closing Gaps Priority Areas.

Calculation

Average Change Score
$$= \frac{-0.025 + 0.008 + (-0.029) + (-0.004) + (-0.012) + (-0.002) + (-0.016) + (-0.028)}{8}$$
$$= -0.0135$$

Possible Points $= 50$

Closing Achievement Gaps Score $= [(-0.0135 * 4.77) + 0.72] * 50 = 32.8$

Sample Elementary has a **Closing Achievement Gaps** score in English language arts of 32.8.
(The score of 32.6 for Sample Elementary is caused by rounding differences in the index.)

Closing Graduation Gaps Example

The process for calculating a Closing Graduation Gaps score is similar to that for achievement gaps, with some differences:

1. "Students in Cohort" takes the place of "Students Tested."
2. "Graduation Rates" take the place of "Points-Based Proficiency Rates."
3. The 4-year and 6-year Closing Graduation Gap cohort scores are calculated separately. Each is calculated as the average difference in rate of change for subgroups in that cohort.
4. The Closing Graduation Gaps score is the average of the Closing Graduation Gaps – 4-Year Cohort score and the Closing Graduation Gaps – 6-Year Cohort score, adjusted to align with the scale used in the Student Achievement Priority Area. If only one cohort score is available, the Closing Graduation Gaps score is equal to that cohort score.
5. The number of possible points is 50 if the school has Closing Achievement Gaps data described above, or 100 if it does not. The numbers in the score formula that align Closing Graduation Gaps to Student Achievement are different. These numbers were determined from statistical norming of the Student Achievement, Growth, and Closing Gaps Priority Areas.

$$\text{Closing Graduation Gaps Score} = [(\text{Average of 4-year and 6-year Closing Graduation Gap Cohort Scores} * 2.82) + 0.55] * \text{Possible Points}$$

Note that because graduation rates require at least four years of data to calculate and DPI only has two years of collected data for Choice schools in 2016-17, these rates cannot be calculated for Choice schools. Closing Graduation Gaps scores will therefore be "NA" on both versions of the Private School report cards.

We will step through the process to illustrate using Sample High School data.

Step 1: Calculate the Difference in Rates of Change for Each Target Group-Comparison Pair

Closing Graduation Gaps - Four Year | Score: 13.6/25

School Target Group Graduation Rates						State Comparison Group Graduation Rates						Rate of Change		Difference in Rate of Change
Group	2011-12 Graduation Rate	2012-13 Graduation Rate	2013-14 Graduation Rate	2014-15 Graduation Rate	2015-16 Graduation Rate	Group	2011-12 Graduation Rate	2012-13 Graduation Rate	2013-14 Graduation Rate	2014-15 Graduation Rate	2015-16 Graduation Rate	School Target Group	State Comparison Group	
American Indian or Alaskan Native	NA	NA	NA	NA	NA		NA	NA	NA	NA	NA	NA	NA	NA
Asian	0.894	0.868	0.761	0.778	0.952		0.923	0.925	0.929	0.931	0.928	-0.009	0.002	-0.011
Black or African American	NA	0.714	0.378	0.826	0.679		NA	0.925	0.929	0.931	0.928	0.029	0.001	0.028
Hispanic/Latino	0.625	0.893	0.600	0.622	0.750	White	0.923	0.925	0.929	0.931	0.928	-0.002	0.002	-0.004
Native Hawaiian or Pacific Islander	NA	NA	NA	NA	NA		NA	NA	NA	NA	NA	NA	NA	NA

Economically Disadvantaged	0.747	0.774	0.592	0.734	0.715	Not Economically Disadvantaged	0.931	0.932	0.939	0.940	0.936	-0.010	0.002	-0.012
Limited English Proficient	NA	NA	NA	NA	NA	English Proficient	NA	NA	NA	NA	NA	NA	NA	NA
"All 3" Supergroup	NA	NA	NA	NA	NA	Not in "All 3" Supergroup	NA	NA	NA	NA	NA	NA	NA	NA
"SwD-ECD" Supergroup	NA	NA	NA	NA	NA	Not in "SwD-ECD" Supergroup	NA	NA	NA	NA	NA	NA	NA	NA
"SwD-LEP" Supergroup	NA	NA	NA	NA	NA	Not in "SwD-LEP" Supergroup	NA	NA	NA	NA	NA	NA	NA	NA
"ECD-LEP" Supergroup	NA	NA	NA	NA	NA	Not in "ECD-LEP" Supergroup	NA	NA	NA	NA	NA	NA	NA	NA

Difference in Rate of Change
$$= \text{School Target Group Rate of Change - State Comparison Group Rate of Change}$$

Asian students: Difference in Rate of Change $= -0.009 - 0.002 = -0.011$
Black students: Difference in Rate of Change $= 0.029 - 0.001 = 0.028$
Hispanic students: Difference in Rate of Change $= -0.002 - 0.002 = -0.004$
Students with Disabilities: Difference in Rate of Change $= -0.010 - 0.002 = -0.012$
Economically Disadvantaged students: Difference in Rate of Change $= -0.010 - 0.002 = -0.012$

$$\text{Average Change Score} = \frac{-0.011 + 0.028 + (-0.004) + (-0.012) + (-0.012)}{5} = -0.0022$$

Possible Points $= 25$

Closing Graduation Gaps Score $= [(-0.0022 * 2.82) + 0.55] * 25 = 13.6$

Step 2: Determine the Closing Graduation Gaps Score

Once we have a Difference in Rate of Change score for each group-comparison pair in the school, we average the raw scores together and use a formula to determine the Closing Graduation Gaps score in order to put Closing Gaps scores on the same scale as Student Achievement.

Definitions

Average Change Score $=$ Average of all change scores calculated for the school

Possible Points	If the school has the following data:	
25		Closing Graduation Gaps—Four Year
	AND	Closing Graduation Gaps—Six Year
	AND	Achievement Gaps
50		Closing Graduation Gaps—Four Year
	OR	Closing Graduation Gaps—Six Year
	AND	Achievement Gaps
100		Closing Graduation Gaps—Four Year
	OR	Closing Graduation Gaps—Six Year

Formula

Closing Graduation Gaps - Four Year Score
$$= [(\text{Average Change Score} * 2.82) + 0.55] * \text{Possible Points}$$

Note: 2.82 and 0.55 are numbers that align Closing Gaps scores to a scale based on the Student Achievement Priority Area. These numbers were determined from statistical modeling of the Student Achievement, Growth, and Closing Gaps Priority Areas.

Calculation

$$\text{Average Change Score} = \frac{-0.011 + 0.028 + (-0.004) + (-0.012) + (-0.012)}{5} = -0.0022$$

$$\text{Possible Points} = 25$$

$$\text{Closing Graduation Gaps Score} = [(-0.0022 * 2.82) + 0.55] * 25 = \mathbf{13.6}$$

Sample High has a Closing Graduation Gaps – Four Year Score of 13.6.

Step 3: Combine the Closing Graduation Gaps – Four Year Score and Closing Graduation Gaps – Six Year Score

If a school has both a Closing Graduation Gaps – Four Year and a Closing Graduation Gaps – Six Year score then they need to be added together to create an overall Closing Graduation Gaps score.

Formula

$$\text{Closing Graduation Gaps Score}$$
$$= \text{Closing Graduation Gaps-Four Year Score} + \text{Closing Graduation Gaps-Six Year Score}$$

Calculation

Note that the calculations to arrive at a Closing Graduation Gaps – Six Year Score of 14.2 are not shown in this document as they are the same as the calculations used for the Closing Graduation Gaps – Four Year Score.

$$\text{Closing Graduation Gaps Score} = 13.6 + 14.2 = 27.8$$

Sample High has a Closing Graduation Gaps Score of 27.8.

Closing Gaps Priority Area Worksheet

This worksheet has four parts: Closing English Language Arts Achievement Gaps, Closing Mathematics Achievement Gaps, Closing Graduation Gaps – Four Year, and Closing Graduation Gaps – Six Year. Each part requires you to pull data from the Closing Gaps detail in the School Report Card Detail. **Note that the score calculated here may not exactly match the report card due to rounding differences**. The Report Card Detail for a particular school will include some or all Closing Gaps data:

- Closing English Language Arts Achievement Gaps and Closing Mathematics Achievement Gaps only
- Closing Graduation Gaps – Four Year only
- Closing Graduation Gaps – Six Year only
- Some combination of the above achievement and graduation components

A school will not have Closing Achievement Gaps data and scores reported unless they are available for both ELA and mathematics. The combination of Closing Gaps components calculated and reported for a school determines the number of possible points for each component, as shown in the table below:

Component	Scenario 1 Achievement Only		Scenario 2 Graduation – Four Year Only		Scenario 3 Graduation – Six Year Only		Scenario 4 Both Graduation		Scenario 5 Achievement and Graduation	
	Present?	Possible points	Present?	Possible points	Present?	Possible points	Present?	Possible Points	Present?	Possible points
Closing English Language Arts Achievement Gaps	Yes	50	No	-	No	-	No	-	Yes	25
Closing Mathematics Achievement Gaps	Yes	50	No	-	No	-	No	-	Yes	25
Closing Graduation Gaps – Four Year	No	-	Yes	100	No	-	Yes	50	Yes	25
Closing Graduation Gaps – Six Year	No	-	No	-	Yes	100	Yes	50	Yes	25

Component	Scenario 6 Achievement and Graduation – Four Year		Scenario 7 Achievement and Graduation – Six Year		Scenario 8 ELA Achievement and Graduation		Scenario 9 Math Achievement and Graduation	
	Present?	Possible points	Present?	Possible points	Present?	Possible points	Present?	Possible Points
Closing English Language Arts Achievement Gaps	Yes	25	No	25	No	50	No	-
Closing Mathematics Achievement Gaps	Yes	25	No	25	No	-	No	50
Closing Graduation Gaps – Four Year	No	50	Yes	-	No	25	Yes	25
Closing Graduation Gaps – Six Year	No	-	No	50	Yes	25	Yes	25

Instructions

Complete the worksheets that include components calculated for the school, entering data from the School Report Card Detail where appropriate. When all applicable worksheets are complete, add the component scores in the space below to determine the school's total Closing Gaps score:

       Closing English Language Arts Achievement Gaps Score: _____ out of _____ points

       Closing Mathematics Achievement Gaps Score: _____ out of _____ points

       Closing Graduation Gaps – Four Year Score: _____ out of _____ points

+   **Closing Graduation Gaps – Six Year Score:**   _____ out of _____ points

       Closing Gaps Priority Area Score: _____ out of 100 points

Closing English Language Arts Achievement Gaps Worksheet

Step 1: Calculate the Difference in Rate of Change for Each Target Group – Comparison Pair

Enter data from the Closing Achievement Gaps - English Language Arts "Rate of Change" columns under the "School Target Group" and "State Comparison Group" headings in the Report Card Detail table. If "NA" is given for a particular pair of target and comparison groups, leave the boxes blank for that pair.

Subtract the state comparison from the school target group in Points-Based Proficiency Rate to determine the difference in rate of change.

Rate of Change

School Target Group	State Comparison Group	School Target Group	State Comparison Group		Difference in Rate of Change
American Indian or Alaskan Native	White	1a	2a	1a-2a:	3a
Asian	White	1b	2b	1b-2b:	3b
Black or African American	White	1c	2c	1c-2c:	3c
Hispanic/Latino	White	1d	2d	1d-2d:	3d
Native Hawaiian or other Pacific Islander	White	1e	2e	1e-2e:	3e
Two or more races	White	1f	2f	1f-2f:	3f
Students with Disabilities	Students without Disabilities	1g	2g	1g-2g:	3g
Economically Disadvantaged	Not Economically Disadvantaged	1h	2h	1h-2h:	3h
Limited English Proficient	English Proficient	1i	2i	1i-2i:	3i
"All 3" Supergroup	Not in "All 3" Supergroup	1j	2j	1j-2j:	3j
"SwD-ECD" Supergroup	Not in "SwD-ECD" Supergroup	1k	2k	1k-2k:	3k
"SwD-LEP" Supergroup	Not in "SwD-LEP" Supergroup	1l	2l	1l-2l:	3l
"ECD-LEP" Supergroup	Not in "ECD-LEP" Supergroup	1m	2m	1m-2m:	3m

Step 2: Determine the Closing English Language Arts Achievement Gaps Score

(4a) Count number of non-blank Difference in Rate of Change values
   (in Step 1: 3a, 3b, 3c, 3d, 3e, 3f, 3g, 3h, 3i, 3j, 3k, 3l, 3m) | 4a |

(4b) Sum the Change Scores
   (from Step 1: 3a+3b+3c+3d+3e+3f+3g+3h+3i+3j+3k+3l+3m) | 4b |

(4c) Determine the Average Change Score (4b/4a) | 4c |

(4d) Does the school have Closing Graduation Gaps data?   4d ☐ Yes ☐ No

Possible Points: (4e) If 4d is "Yes," enter 25; if "No," enter 50: | 4e |

(4f) Enter Average Change Score from 4c: | 4f |

(4g) Multiply 4f by 4.77: | 4g |

(4h) Add 4g to 0.72: | 4h |

(4i) Enter Possible Points from 4e: | 4i |

(4j) Closing English Language Arts Achievement Gaps Score Multiply 4h and 4i: | 4j |

Closing Mathematics Achievement Gaps Worksheet

Step 1: Calculate the Difference in Rate of Change for Each Target Group – Comparison Pair

Enter data from the Closing Achievement Gaps - Mathematics "Rate of Change" columns under the "School Target Group" and "State Comparison Group" headings in the Report Card Detail table. If "NA" is given for a particular pair of target and comparison groups, leave the boxes blank for that pair.

Subtract the state comparison from the school target group in Points-Based Proficiency Rate to determine the difference in rate of change.

Rate of Change

School Target Group	State Comparison Group	School Target Group	State Comparison Group	Difference in Rate of Change	
American Indian or Alaskan Native	White	1a	2a	1a-2a:	3a
Asian	White	1b	2b	1b-2b:	3b
Black or African American	White	1c	2c	1c-2c:	3c
Hispanic/Latino	White	1d	2d	1d-2d:	3d
Native Hawaiian or other Pacific Islander	White	1e	2e	1e-2e:	3e
Two or more races	White	1f	2f	1f-2f:	3f
Students with Disabilities	Students without Disabilities	1g	2g	1g-2g:	3g
Economically Disadvantaged	Not Economically Disadvantaged	1h	2h	1h-2h:	3h
Limited English Proficient	English Proficient	1i	2i	1i-2i:	3i
"All 3" Supergroup	Not in "All 3" Supergroup	1j	2j	1j-2j:	3j
"SwD-ECD" Supergroup	Not in "SwD-ECD" Supergroup	1k	2k	1k-2k:	3k
"SwD-LEP" Supergroup	Not in "SwD-LEP" Supergroup	1l	2l	1l-2l:	3l
"ECD-LEP" Supergroup	Not in "ECD-LEP" Supergroup	1m	2m	1m-2m:	3m

Step 2: Determine the Closing Mathematics Achievement Gaps Score

(4a) Count number of non-blank Difference in Rate of Change values
(in Step 1: 3a, 3b, 3c, 3d, 3e, 3f, 3g, 3h, 3i, 3j, 3k, 3l, 3m) — 4a

(4b) Sum the Change Scores
(from Step 1: 3a+3b+3c+3d+3e+3f+3g+3h+3i+3j+3k+3l+3m) — 4b

(4c) Determine the Average Change Score (4b/4a) — 4c

(4d) Does the school have Closing Graduation Gaps data? — 4d ☐ Yes ☐ No

Possible Points: (4e) If 4d is "Yes," enter 25; if "No," enter 50: — 4e

(4f) Enter Average Change Score from 4c: — 4f

(4g) Multiply 4f by 4.77: — 4g

(4h) Add 4g to 0.72: — 4h

(4i) Enter Possible Points from 6e: — 4i

(4j) Closing Mathematics Achievement Gaps Score: Multiply 4h and 4i: — **4j**

Closing Graduation Gaps Worksheet

Step 1: Calculate the Difference in Rate of Change for the Four Year Rate for Each Target Group – Comparison Pair

Enter data from the Closing Graduation Gaps – Four Year "Rate of Change" columns under the "School Target Group" and "State Comparison Group" headings in the Report Card Detail table. If "NA" is given for a particular pair of target and comparison groups, leave the boxes blank for that pair.

Subtract the state comparison from the school target group in Points-Based Proficiency Rate to determine the difference in rate of change.

Rate of Change

School Target Group	State Comparison Group	School Target Group	State Comparison Group		Difference in Rate of Change
American Indian or Alaskan Native	White	1a	2a	1a-2a:	3a
Asian	White	1b	2b	1b-2b:	3b
Black or African American	White	1c	2c	1c-2c:	3c
Hispanic/Latino	White	1d	2d	1d-2d:	3d
Native Hawaiian or other Pacific Islander	White	1e	2e	1e-2e:	3e
Two or more races	White	1f	2f	1f-2f:	3f
Students with Disabilities	Students without Disabilities	1g	2g	1g-2g:	3g
Economically Disadvantaged	Not Economically Disadvantaged	1h	2h	1h-2h:	3h
Limited English Proficient	English Proficient	1i	2i	1i-2i:	3i
"All 3" Supergroup	Not in "All 3" Supergroup	1j	2j	1j-2j:	3j
"SwD-ECD" Supergroup	Not in "SwD-ECD" Supergroup	1k	2k	1k-2k:	3k
"SwD-LEP" Supergroup	Not in "SwD-LEP" Supergroup	1l	2l	1l-2l:	3l
"ECD-LEP" Supergroup	Not in "ECD-LEP" Supergroup	1m	2m	1m-2m:	3m

Step 2: Determine the Closing Graduation Gaps – Four Year Score

(4a) Count number of non-blank Difference in Rate of Change values
(in Step 1: 3a, 3b, 3c, 3d, 3e, 3f, 3g, 3h, 3i, 3j, 3k, 3l, 3m)

4a

(4b) Sum the Change Scores
(from Step 1: 3a+3b+3c+3d+3e+3f+3g+3h+3i+3j+3k+3l+3m)

4b

(4c) Determine the Average Change Score (4b/4a)

4c

(4d) Does the school have Closing Achievement Gaps data?   4d ☐ Yes ☐ No

(4e) If 4d is "Yes," enter 50; if "No," enter 100:

4e

(4f) Does the school have Closing Graduation Gaps - Six Year data?   4f ☐ Yes ☐ No

Possible Points (4g): If 4f is "Yes", multiply 4e by 0.5; if "No", multiply by 1

4g

(4h) Enter Average Change Score from 4c:

4h

(4i) Multiply 4h by 2.82:

4i

(4j) Add 4i to 0.55:

4j

(4k) Enter Possible Points from 4g:

4k

(4l) Closing Graduation Gaps – Four Year Score: Multiply 4j and 4k:

4l

Step 3: Calculate the Difference in Rate of Change for the Six Year Rate for Each Target Group – Comparison Pair

Enter data from the Closing Graduation Gaps – Six Year "Rate of Change" columns under the "School Target Group" and "State Comparison Group" headings in the Report Card Detail table. If "NA" is given for a particular pair of target and comparison groups, leave the boxes blank for that pair.

Subtract the state comparison from the school target group in Points-Based Proficiency Rate to determine the difference in rate of change.

Rate of Change

School Target Group	State Comparison Group	School Target Group	State Comparison Group		Difference in Rate of Change
American Indian or Alaskan Native	White	5a	6a	5a-6a:	7a
Asian	White	5b	6b	5b-6b:	7b
Black or African American	White	5c	6c	5c-6c:	7c
Hispanic/Latino	White	5d	6d	5d-6d:	7d
Native Hawaiian or other Pacific Islander	White	5e	6e	5e-6e:	7e
Two or more races	White	5f	6f	5f-6f:	7f
Students with Disabilities	Students without Disabilities	5g	6g	5g-6g:	7g
Economically Disadvantaged	Not Economically Disadvantaged	5h	6h	5h-6h:	7h
Limited English Proficient	English Proficient	5i	6i	5i-6i:	7i
"All 3" Supergroup	Not in "All 3" Supergroup	5j	6j	5j-6j:	7j
"SwD-ECD" Supergroup	Not in "SwD-ECD" Supergroup	5k	6k	5k-6k:	7k
"SwD-LEP" Supergroup	Not in "SwD-LEP" Supergroup	5l	6l	5l-6l:	7l
"ECD-LEP" Supergroup	Not in "ECD-LEP" Supergroup	5m	6m	5m-6m:	7m

Step 4: Determine the Closing Graduation Gaps – Six Year Score

(8a) Count number of non-blank Difference in Rate of Change values

    (in Step 3: 7a, 7b, 7c, 7d, 7e, 7f, 7g, 7h, 7i, 7j, 7k, 7l, 7m)   8a

(8b) Sum the Change Scores

    (from Step 3: 7a+7b+7c+7d+7e+7f+7g+7h+7i+7j+7k+7l+7m)   8b

(8c) Determine the Average Change Score (8b/8a)   8c

(8d) Does the school have Closing Achievement Gaps data?   8d ☐ Yes ☐ No

(8e) If 8d is "Yes," enter 50; if "No," enter 100:   8e

(8f) Does the school have Closing Graduation Gaps - Four Year data?   8f ☐ Yes ☐ No

Possible Points (8g): If 8f is "Yes", multiply 8e by 0.5; if "No", multiply by 1   8g

(8h) Enter Average Change Score from 8c: 8h

(8i) Multiply 8h by 2.82:   8i

(8j) Add 8i to 0.55:   8j

(8k) Enter Possible Points from 8g: 8k

(8l) Closing Graduation Gaps – Six Year Score: Multiply 8j and 8k: **8l**

Step 5: Determine the Closing Graduation Gaps – Graduation Rate Gaps Score

(9a) Enter Closing Graduation Gaps – Four Year Score

9a	

(9b) Enter Closing Graduation Gaps – Six Year Score

9b	

Calculate Closing Graduation Gaps – Graduation Rate Gaps Score (9c): Add 9a and 9b

9c	

Calculating Priority Area Scores
On-Track to Graduation and Postsecondary Readiness

The On-Track and Postsecondary Readiness Priority Area is designed to evaluate schools on how successfully students are achieving educational milestones that predict student success. It includes attendance, graduation, and student achievement at key transition points: 3rd grade English language arts and 8th grade mathematics.

Background

The mission of Wisconsin public schools is to ensure that every student becomes a high school graduate ready for college and career. The process of getting a student to graduation begins well before 12th grade, and there are key indicators throughout elementary, middle, and high school that have a direct impact on a student's future likelihood of success. This Priority Area is designed to hold schools accountable for a number of these key indicators.

A graduation/attendance component makes up the bulk of this Priority Area's score. Schools that graduate students are held accountable for graduation rates, and all other schools are held accountable for attendance rates.

- **Attendance** drives all aspects of student success throughout their school career.
- **Graduation rate** measures the outcome of our schools' overarching mission and is calculated as a cohort rate—the percentage of students starting high school together who graduate within a certain time.

Attendance data and graduation data have some similarities. Both are lagged indicators, in that data for the 2016-17 report card are not yet available. As such, we report on the 2015-16 data. Additionally, attendance and graduation track each other fairly closely and have similar, narrow distributions of high rates. That is, the state average is around 90% to 95% for both attendance and graduation.

Note that because these graduation rates require four and six years of data, respectively, to calculate, graduation rates cannot be calculated for Choice schools. Therefore, both the Private School – Choice Students and Private School – All Students Report Cards will not have Graduation Rate component scores within the On-Track Priority Area but will have scores for the Attendance Rate component.

> **District and school calculations differ**
>
> In the On-Track and Postsecondary Readiness Priority Area, schools are only held accountable for *either* graduation rate (when available) or attendance (when graduation rate is not available).
>
> By comparison, for district report cards, districts that graduate students are held accountable for *both* graduation rates and attendance rates; districts that do not graduate students are held accountable for attendance rates only. See On-Track Walkthrough #3 for an

Other On-Track measures may also contribute to a school's Priority Area score.

- **English language arts achievement in 3rd grade** and **mathematics achievement in 8th grade** are measures that strongly predict future success as students move into middle school and high school.

Due to the diversity of school types in Wisconsin, not all of these On-Track measures apply to every school. Combining the measures into a Priority Area score in a way that treats all schools fairly, regardless of grade

span, is necessary but is also complex. As other indicators of postsecondary readiness become available, we will evaluate them for inclusion in this Priority Area.

Reading the Report Card Detail

Attendance

The first table shown in the On-Track and Postsecondary Readiness detail is the attendance rate, the number of days that students actually attended (days in seat) divided by the number of days they could possibly have attended (days enrolled). Only students in kindergarten through 12th grade are included in attendance calculations. Data are presented for all students and the lowest-attending student group,[4] which are averaged to determine the attendance score.

Supergroups are used when individual student groups are too small to be measured individually; see Closing Gaps for a description of supergroups.

Group	Enrollment	Attended Days	Possible Days	Rate
All Students	248	42,199.0	43,830.0	96.3%
Lowest Group: Students with Disabilities	32	5,195.5	5,604.5	92.7%

Attendance scores are reported out of 80 maximum points when other On-Track and Postsecondary Readiness components are available, and out of 100 when no other components are available. Because attendance rates are high statewide, attendance scores are always taken out of 80 when combining On-Track and Postsecondary Readiness scores with other Priority Areas, to ensure an equitable calculation for all schools regardless of their grade configuration or the data they have.

> **District and school calculations differ**
>
> For district report cards for districts with both graduation and attendance data, attendance scores and graduation scores are each taken out of 40 maximum points, rather than 80 points.

Graduation

The next table shows graduation rate information:

Group	Four-Year Cohort Graduation Rate			Six-Year Cohort Graduation Rate		
	Students in Cohort	Graduates	Rate	Students in Cohort	Graduates	Rate
All Students	311	255	82.0%	328	299	91.2%

Graduation rates are given for a cohort of students comprising the high school students who make up a particular four-year graduating class based on 9th grade entry and do not transfer to a private school that is not in the Choice program, move to another state or country, or are deceased. We report two graduation rates:

- The four-year cohort graduation rate is the percentage of students in the cohort at the end of the fourth year who graduated from high school.
- The six-year cohort graduation rate is the percentage of students in the cohort at the end of the sixth year (e.g. at the end of 2015-16 for the 2013-14 cohort) who graduated from high school. This "extended" rate is used to include students who require more than four years to finish high school.

---

[4] The lowest attending subgroup can be one of the school target groups listed in the Closing Gaps Priority Area or the white students subgroup.

Graduation scores are reported out of 80 maximum points when other On-Track and Postsecondary Readiness components are available, and out of 100 when no other components are available. Because graduation rates are high statewide, graduation scores are always taken out of 80 when combining On-Track and Postsecondary Readiness scores with other Priority Areas, to ensure an equitable calculation for all schools regardless of their grade configuration or the data they have.

3rd Grade English Language Arts/8th Grade Mathematics Achievement

The final two tables in the On-Track and Postsecondary Readiness detail give information on English language arts achievement for 3rd grade students and mathematics achievement for 8th grade students. These tables are presented in the same format as Student Achievement, as described in that section of this guide.

The difference between this specific measure and other parts of the report card is in how cell size (the minimum number of students with data necessary to calculate a score)I is used. In most places we use a cell size of 20 in the most recent year, but applying this to a single grade would omit a large number of small elementary schools. Instead, for this measure only, we use a cell size of 20 over the two most recent years. This change affects only whether data is presented on the report card and used to determine a score, not the process by which the score is calculated.

Combining Individual Components into a Priority Area Score

The graduation/attendance component of On-Track, which applies to every school, has a maximum score of 80 points. The other On-Track components add up to a possible maximum of 20 points. Because different components of the 'Other' On-Track components apply to different types of schools, the number of points possible for each one depends on what combination of them applies to a given school. If a school has only 3rd grade English language arts or only 8th grade mathematics scores available, then the component is worth 20 points; if a school has both 3rd grade English language arts and 8th grade mathematics data, each component is worth 10 points. This is specified in the following table:

3rd Grade English Language Arts =	20	if no 8th grade mathematics data are available
	10	if 8th grade mathematics data are available
8th Grade Mathematics =	20	if no 3rd grade English language arts data are available
	10	if 3rd grade English language arts data are available

On-Track Walkthrough #1

This walkthrough uses data on attendance and 3rd grade English language arts achievement to determine a score for Sample Elementary School.

Step 1: Calculate the Graduation/Attendance Score

Group	Enrollment	Attended Days	Possible Days	Rate
All Students	248	42,997.5	43,830.0	98.1%
Lowest Group: Hispanic Students	31	5,346.0	5,656.5	94.5%

This is an elementary school and does not graduate students, so its attendance rates are used to determine the graduation/attendance score.

First, calculate the attendance rate (expressed as a decimal, not a percentage) of the 'all students'' group and the attendance rate of the lowest attending subgroup:

$$\text{Attendance Rate} = \frac{\text{\# of Attended Days}}{\text{\# of Possible Enrollment Days}}.$$

Then, calculate the graduation/attendance score out of 80 by averaging the attendance rates of the 'all students" and lowest attending subgroups and multiplying by 80:

$$\text{Graduation/Attendance Score} = \frac{\text{All Students Rate} + \text{Lowest Group Rate}}{2} * 80$$

$$\text{Graduation/Attendance Score} = \frac{0.981 + 0.945}{2} * 80 = \mathbf{77.0}$$

Step 2: Calculate the 3rd Grade English Language Arts Achievement Score

Performance Level	Points Multiplier	2014-15			2015-16			2016-17		
		Students			Students			Students		
		Count	Percent	Points	Count	Percent	Points	Count	Percent	Points
Advanced	1.5	9	20.9%	13.5	10	22.7%	15	8	19.0%	12
Proficient	1	11	25.6%	11	14	31.8%	14	14	33.3%	14
Basic	0.5	10	23.3%	5	9	20.5%	4.5	11	26.2%	5.5
Below Basic	0	13	30.2%	0	11	25.0%	0	9	21.4%	0
Total Tested	-	43	100.0%	29.5	44	100.0%	33.5	42	100.0%	31.5

The method for calculating the 3rd grade English language arts and 8th grade mathematics achievement scores is the same as described in the Student Achievement walkthrough (starting on page 20), with the difference that the multiplier used in the final step varies depending on the number of possible points for this component. A simplified version of that walkthrough is presented here; for a detailed description, please the Student Achievement section of this guide.

Step 2A: Assign and Average Points

Prior Year 2 Average $= 29.5/43 = \mathbf{0.686}$

Prior Year 1 Average $= 33.5/44 = \mathbf{0.761}$

Current Year Average $= 31.5/42 = \mathbf{0.750}$

Step 2B: Calculate Annual Weights

$$\text{Prior Year 2 Weight} = 1 * \frac{\text{Prior Year 2 Students Tested}}{\text{Average Students Tested}} = 1 * \frac{43}{(43 + 44 + 42)/3} = \mathbf{1.000}$$

$$\text{Prior Year 1 Weight} = 1.25 * \frac{\text{Prior Year 1 Students Tested}}{\text{Average Students Tested}} = 1.25 * \frac{44}{(43 + 44 + 42)/3} = \mathbf{1.279}$$

$$\text{Current Year Weight} = 1.5 * \frac{\text{Current Year Students Tested}}{\text{Average Students Tested}} = 1.5 * \frac{42}{(43 + 44 + 42)/3} = \mathbf{1.465}$$

Step 2C: Combine Points and Weights

Prior Year 2 Score = Prior Year 2 Avg. * Prior Year 2 Weight = $0.686 * 1.000 = \mathbf{0.686}$

Prior Year 1 Score = Prior Year 1 Avg. * Prior Year 1 Weight = $0.761 * 1.279 = \mathbf{0.973}$

Current Year Score = Current Year Avg. * Current Year Weight = $0.750 * 1.465 = \mathbf{1.099}$

Step 2D: Calculate Component Score

$$\text{Comp. Score} = \frac{\text{Prior Year 2 Score} + \text{Prior Year 1 Score} + \text{Current Year Score}}{\text{Prior Year 2 Weight} + \text{Prior Year 1 Weight} + \text{Current Year Weight}} * \text{Poss. Pts.}$$

Sample Elementary School only has a 3rd grade English language arts achievement component, so the number of possible points is 20:

$$\text{3rd Grade English Language Arts Achievement Score} = \frac{0.686 + 0.973 + 1.099}{1.000 + 1.279 + 1.465} * 20 = \mathbf{14.7}$$

Step 3: Determine the Total On-Track and Postsecondary Readiness Score

The total score for this Priority Area is the sum of all its components' scores:

Graduation/Attendance Score

77.0

3rd Grade English Language Arts Achievement Score +

14.7

Total On-Track and Postsecondary Readiness Score

91.7

Sample Elementary School has an On-Track and Postsecondary Readiness score of 91.7.

On-Track Walkthrough #2

This walkthrough will use data on graduation, 8th grade mathematics achievement, and 3rd grade English language arts to determine a score for Sample K-12 School.

Step 1: Calculate the Graduation/Attendance Score

Attendance

Group	Enrollment	Attended Days	Possible Days	Rate
All Students	252	39288.0	42173.0	93.3%
Lowest Group: White Students	180	28063	32400	86.6%

Graduation

Group	Four-Year Cohort Graduation Rate			Six-Year Cohort Graduation Rate		
	Students in Cohort	Graduates	Rate	Students in Cohort	Graduates	Rate
All Students	21	18	85.7%	31	29	93.5%

Sample K-12 School graduates students, so we use graduation rates to determine this score. The graduation/attendance score is calculated as the average of the four-year cohort rate and the six-year cohort rate, weighted by the number of students in each cohort. The average is then multiplied by 80 to produce a score out of a maximum of 80 points:

$$\text{Graduation/Attendance score}$$
$$= \frac{(\text{4-Year Rate} * \text{Students in 4-year cohort}) + (\text{6-Year Rate} * \text{Students in 6-year cohort})}{\text{Students in 4-year cohort} + \text{Students in 6-year cohort}}.$$

$$\text{Graduation/Attendance Score} = \frac{(.857 * 21) + (.935 * 31)}{21 + 31} * 80 = \mathbf{72.3}$$

Step 2: Calculate the 8th Grade Mathematics Achievement Score

Performance Level	Points Multiplier	2014-15			2015-16			2016-17		
		Students			Students			Students		
		Count	Percent	Points	Count	Percent	Points	Count	Percent	Points
Advanced	1.5	4	21.1%	6	3	16.7%	4.5	3	14.3%	4.5
Proficient	1	6	31.6%	6	5	27.8%	5	7	33.3%	7
Basic	0.5	5	26.3%	2.5	6	33.3%	3	8	38.1%	4
Below Basic	0	4	21.1%	0	4	22.2%	0	3	14.3%	0
Total Tested	-	19	100.0%	14.5	18	100.0%	12.5	21	100.0%	15.5

Step 2A: Assign and Average Points

$$\text{Prior Year 2 Average} = 14.5/19 = \mathbf{0.763}$$

$$\text{Prior Year 1 Average} = 12.5/18 = \mathbf{0.694}$$

$$\text{Current Year Average} = 15.5/21 = \mathbf{0.738}$$

Step 2B: Calculate Annual Weights

$$\text{Prior Year 2 Weight} = 1 * \frac{19}{(19 + 18 + 21)/3} = \mathbf{0.983}$$

$$\text{Prior Year 1 Weight} = 1.25 * \frac{18}{(19 + 18 + 21)/3} = \mathbf{1.164}$$

$$\text{Current Year Weight} = 1.5 * \frac{21}{(19 + 18 + 21)/3} = \mathbf{1.629}$$

Step 2C: Combine Points and Weights

$$\text{Prior Year 2 Score} = 0.763 * 0.983 = \mathbf{0.750}$$

$$\text{Prior Year 1 Score} = 0.694 * 1.164 = \mathbf{0.808}$$

$$\text{Current Year Score} = 0.738 * 1.629 = \mathbf{1.202}$$

Step 2D: Calculate Component Score

With 3rd grade English language arts achievement present for the school, the possible score for this component is 10 points:

$$\text{8th Grade Mathematics Achievement Score} = \frac{0.750 + 0.808 + 1.202}{0.983 + 1.164 + 1.629} * 10 = \mathbf{7.3}$$

Step 3: Calculate the 3rd Grade English Language Arts Achievement Score

Performance Level	Points Multiplier	2014-15			2015-16			2016-17		
		Students			Students			Students		
		Count	Percent	Points	Count	Percent	Points	Count	Percent	Points
Advanced	1.5	7	31.8%	10.5	3	17.6%	4.5	6	31.3%	9
Proficient	1	10	45.5%	10	8	47.1%	8	6	43.8%	6
Basic	0.5	3	13.6%	1.5	4	23.6%	2	3	18.8%	1.5
Below Basic	0	2	9.1%	0	2	11.8%	0	1	6.3%	0
Total Tested	-	22	100.0%	22	17	100.0%	14.5	16	100.0%	16.5

Step 3A: Assign and Average Points

$$\text{Prior Year 2 Average} = 22/22 = \mathbf{1.000}$$

$$\text{Prior Year 1 Average} = 14.5/17 = \mathbf{0.853}$$

$$\text{Current Year Average} = 16.5/16 > \mathbf{1.000}$$

Note: Remember that the average has a maximum value of one—the true average for the current year is 1.031 (16.5/16) but we use 1.000 in the calculation.

Step 3B: Calculate Annual Weights

$$\text{Prior Year 2 Weight} = 1 * \frac{22}{(22 + 17 + 16)/3} = \mathbf{1.200}$$

$$\text{Prior Year 1 Weight} = 1.25 * \frac{17}{(22 + 17 + 16)/3} = \mathbf{1.159}$$

$$\text{Current Year Weight} = 1.5 * \frac{16}{(22 + 17 + 16)/3} = \mathbf{1.309}$$

Step 3C: Combine Points and Weights

$$\text{Prior Year 2 Score} = 1.000 * 1.200 = \mathbf{1.200}$$

$$\text{Prior Year 1 Score} = 0.853 * 1.159 = \mathbf{0.989}$$

$$\text{Current Year Score} = 1.000 * 1.309 = \mathbf{1.309}$$

Step 3D: Calculate Component Score

With 8th grade mathematics achievement present for the school, the possible score for this component is 10 points:

$$\text{3rd Grade English Language Arts Achievement Score} = \frac{1.200 + 0.989 + 1.309}{1.200 + 1.159 + 1.309} * 10 = \mathbf{9.5}$$

Step 4: Determine the Total On-Track and Postsecondary Readiness Score

Graduation/Attendance Score

72.3

8th Grade Mathematics Achievement Score

7.3

3rd Grade English Language Arts Achievement Score   +

9.5

Total On-Track and Postsecondary Readiness Score

89.1

Sample K-12 School has an On-Track and Postsecondary Readiness score of 89.1.

On-Track Walkthrough #3: District calculation

This walkthrough will use data on graduation, attendance, 8th grade mathematics achievement, and 3rd grade English language arts to determine a score for Sample K-12 **District**.

Step 1: Calculate the Graduation/Attendance Score

Attendance

Group	Enrollment	Attended Days	Possible Days	Rate
All Students	953	138,066.5	148,790.0	92.8%
Lowest Group: Students with Disabilities	108	15,548.0	16,982.0	91.6%

Graduation

Group	Four-Year Cohort Graduation Rate			Six-Year Cohort Graduation Rate		
	Students in Cohort	Graduates	Rate	Students in Cohort	Graduates	Rate
All Students	25	21	84.0%	*	*	*

Sample K-12 District is a **district** that graduates students, so we use both attendance and graduation rates to determine the Graduation/Attendance score. Data for the six-year cohort rate are redacted—presumably, the six-year cohort must not meet the cell size of 20. Therefore, the graduation/attendance score is based only on the attendance rate and the four-year cohort graduation rate. Because both graduation and attendance data are present, each is multiplied by the maximum score of 40 instead of 80.

$$\text{Graduation/Attendance Score} = \text{Graduation Score} + \text{Attendance Score}$$

$$\text{Attendance Score} = \frac{\text{All Student Rate} + \text{Lowest Group Rate}}{2} * 40$$

$$\text{Attendance Score} = \frac{0.928 + 0.916}{2} * 40 = \mathbf{36.9}$$

$$\text{Graduation Score} = \text{4-Year Cohort Rate} * 40$$

$$\text{Graduation Score} = 0.840 * 40 = \mathbf{33.6}$$

$$\text{Graduation/Attendance Score} = 33.6 + 36.9 = \mathbf{70.5}$$

Step 2: Calculate the 8th Grade Mathematics Achievement Score

Performance Level	Points Multiplier	2014-15			2015-16			2016-17		
		Students			Students			Students		
		Count	Percent	Points	Count	Percent	Points	Count	Percent	Points
Advanced	1.5	4	21.1%	6	3	16.7%	4.5	3	14.3%	4.5
Proficient	1	6	31.6%	6	5	27.8%	5	7	33.3%	7
Basic	0.5	5	26.3%	2.5	6	33.3%	3	8	38.1%	4
Below Basic	0	4	21.1%	0	4	22.2%	0	3	14.3%	0
Total Tested	-	19	100.0%	14.5	18	100.0%	12.5	21	100.0%	15.5

Step 2A: Assign and Average Points

Prior Year 2 Average $= 14.5/19 = \mathbf{0.763}$

Prior Year 1 Average $= 12.5/18 = \mathbf{0.694}$

Current Year Average $= 15.5/21 = \mathbf{0.738}$

Step 2B: Calculate Annual Weights

$$\text{Prior Year 2 Weight} = 1 * \frac{19}{(19 + 18 + 21)/3} = \mathbf{0.983}$$

$$\text{Prior Year 1 Weight} = 1.25 * \frac{18}{(19 + 18 + 21)/3} = \mathbf{1.164}$$

$$\text{Current Year Weight} = 1.5 * \frac{21}{(19 + 18 + 21)/3} = \mathbf{1.629}$$

Step 2C: Combine Points and Weights

Prior Year 2 Score $= 0.763 * 0.983 = \mathbf{0.750}$

Prior Year 1 Score $= 0.694 * 1.164 = \mathbf{0.808}$

Current Year Score $= 0.738 * 1.629 = \mathbf{1.202}$

Step 2D: Calculate Component Score

With 3rd grade English language arts achievement present for the school, the possible score for this component is 10 points:

$$\text{8th Grade Mathematics Achievement Score} = \frac{0.750 + 0.808 + 1.202}{0.983 + 1.164 + 1.629} * 10 = \mathbf{7.3}$$

Step 3: Calculate the 3rd Grade English Language Arts Achievement Score

Performance Level	Points Multiplier	2014-15			2015-16			2016-17		
		Students			Students			Students		
		Count	Percent	Points	Count	Percent	Points	Count	Percent	Points
Advanced	1.5	7	31.8%	10.5	3	17.6%	4.5	6	31.3%	9
Proficient	1	10	45.5%	10	8	47.1%	8	6	43.8%	6
Basic	0.5	3	13.6%	1.5	4	23.6%	2	3	18.8%	1.5
Below Basic	0	2	9.1%	0	2	11.8%	0	1	6.3%	0
Total Tested	-	22	100.0%	22	17	100.0%	14.5	16	100.0%	16.5

Step 3A: Assign and Average Points

$$\text{Prior Year 2 Average} = 22/22 = \mathbf{1.000}$$

$$\text{Prior Year 1 Average} = 14.5/17 = \mathbf{0.853}$$

$$\text{Current Year Average} = 16.5/16 > \mathbf{1.000}$$

Note: Remember that the average has a ceiling of one—the true average for the current year is 1.031 (16.5/16) but we use 1.000 in the calculation.

Step 3B: Calculate Annual Weights

$$\text{Prior Year 2 Weight} = 1 * \frac{22}{(22 + 17 + 16)/3} = \mathbf{1.200}$$

$$\text{Prior Year 1 Weight} = 1.25 * \frac{17}{(22 + 17 + 16)/3} = \mathbf{1.159}$$

$$\text{Current Year Weight} = 1.5 * \frac{16}{(22 + 17 + 16)/3} = \mathbf{1.309}$$

Step 3C: Combine Points and Weights

$$\text{Prior Year 2 Score} = 1.000 * 1.200 = \mathbf{1.200}$$

$$\text{Prior Year 1 Score} = 0.853 * 1.159 = \mathbf{0.989}$$

$$\text{Current Year Score} = 1.000 * 1.309 = \mathbf{1.309}$$

Step 3D: Calculate Component Score

With 8th grade mathematics achievement present for the school, the possible score for this component is 10 points:

$$\text{3rd Grade English Language Arts Achievement Score} = \frac{1.200 + 0.989 + 1.309}{1.200 + 1.159 + 1.309} * 10 = \mathbf{9.5}$$

Step 4: Determine the Total On-Track and Postsecondary Readiness Score

Graduation/Attendance Score	70.5
8th Grade Mathematics Achievement Score	7.3
+ 3rd Grade English Language Arts Achievement Score	9.5
Total On-Track and Postsecondary Readiness Score	87.3

Sample K-12 District has an On-Track and Postsecondary Readiness score of 87.3.

On-Track and Postsecondary Readiness Priority Area Worksheet

Introduction

This worksheet has four parts: Graduation/Attendance, 8th Grade Mathematics Achievement, and 3rd Grade English Language Arts Achievement. Each part requires you to copy data from the On-Track and Postsecondary Readiness detail pages of the school report card. Your school may not have data for every component—we only report data for components that have scores. **Note that the score calculated here may not exactly match the report card due to rounding**. The key in the Achievement section of this document may be used to help read the 8th grade mathematics/3rd grade English language arts tables.

Instructions

Complete the following worksheet only for the components of On-Track and Postsecondary Readiness that have data on your school's report card. Remember that only one of attendance or graduation—not both—is used to calculate that portion of the score, which is worth up to 80 points. Use this grid to determine the number of possible points for each of the other On-Track components:

 Possible points for 'Other' On-Track components

3rd Grade English Language Arts =	20	if no 8th grade mathematics data are available
	10	if 8th grade mathematics data are available
8th Grade Mathematics =	20	if no 3rd grade English language arts data are available
	10	if 3rd grade English language arts data are available

Total the components calculated for your school in the space below to determine the total Priority Area score:

Graduation/Attendance Score:	_____ out of	80 points
8th Grade Mathematics Achievement Score:	_____ out of	_____ points
+ 3rd Grade English Language Arts Achievement Score:	_____ out of	_____ points
Total On-Track and Postsecondary Readiness Score:	_____ out of 100 points	

Graduation/Attendance Worksheet

Calculate the Graduation/Attendance Score for a *School* (for School Report Card Calculations only)

(1a) Does the school have a reported graduation rate(s)? 1a ☐ Yes ☐ No

(1b) If 1a is "No," enter the attendance rate (in %): `1b`

(1c) If 1a is "No," enter the lowest group attendance rate (in %): `1c`

(1d) Add 1b and 1c: `1d`

(1e) Divide 1d by 200: `1e`

(1f) If 1a is "Yes," enter the 4-year cohort graduation rate (in %): `1f`

(1g) Enter the total number of students in the 4-year cohort: `1g`

(1h) Multiply 1f and 1g: `1h`

(1i) If 1a is "Yes," enter the 6-year cohort graduation rate (in %): `1i`

(1j) Enter the total number of students in the 6-year cohort: `1j`

(1k) Multiply 1i and 1 j: `1k`

(1l) Add 1h and 1k and divide by 100: `1l`

(1m) Add 1g and 1j: `1m`

(1n) Divide 1l by 1m: `1n`

(1o) Enter whichever of 1e or 1n has a value: `1o`

(1p) Graduation/Attendance Score: Multiply 1o by 80: `1p`

Calculate the Graduation/Attendance Score for a *District* (for District Report Card Calculations only)

(1a) Does the district have a reported graduation rate(s)? 1a ☐ Yes ☐ No

(1b) Enter the attendance rate (in %): `1b`

(1c) Enter the lowest group attendance rate (in %): `1c`

(1d) Add 1b and 1c: `1d`

(1e) Divide 1d by 200: `1e`

(1f) If 1a is "Yes", enter 40; if 1a is "No", enter 80 `1f`

(1g) Multiply 1e and 1f `1g`

(1h) If 1a is "Yes," enter the 4-year cohort graduation rate (in %): `1h`

(1i) Enter the total number of students in the 4-year cohort: `1i`

(1j) Multiply 1h and 1i: `1j`

(1k) If 1a is "Yes," enter the 6-year cohort graduation rate (in %): `1k`

(1l) Enter the total number of students in the 6-year cohort: `1l`

(1m) Multiply 1k and 1l: `1m`

(1n) Add 1j and 1m and divide by 100: `1n`

(1o) Add 1i and 1l: `1o`

(1p) Divide 1n by 1o: `1p`

(1q) If 1a is "Yes" multiply 1p by 40; if 1a is "No" enter 0 `1q`

(1r) Graduation/Attendance Score: Add 1g and 1q `1r`

8th Grade Mathematics Achievement Worksheet

Step 1: Assign and Average Points

If a year does not have data shown, leave that year's boxes blank.

Prior Year 2 Average

(1a) Total points earned (B)	1a
(1b) Count of students tested (A)	1b
(1c) Is 1a greater than 1b?	1c ☐ Yes ☐ No
(1d) Average: If 1c is "Yes," enter 1; if 1c is "No," divide 1a by 1b	1d

Prior Year 1 Average

(1e) Total points earned (D)	1e
(1f) Count of students tested (C)	1f
(1g) Is 1e greater than 1f?	1g ☐ Yes ☐ No
(1h) Average: If 1g is "Yes," enter 1; if 1g is "No," divide 1e by 1f	1h

Current Year Average

(1i) Total points earned (F)	1i
(1j) Count of students tested (E)	1j
(1k) Is 1i greater than 1j?	1k ☐ Yes ☐ No
(1l) Average: If 1k is "Yes," enter 1; if 1k is "No," divide 1i by 1j	1l

Step 2: Calculate Annual Weights

Average Enrollment

(2a) Prior Year 2 count of students tested (A) – leave blank if not shown	2a
(2b) Prior Year 1 count of students tested (C) – leave blank if not shown	2b
(2c) Current Year count of students tested (E)	2c
(2d) Add 2a through 2c	2d
(2e) How many of 2a through 2c have values?	2e
(2f) Average number tested: Divide 2d by 2e	2f

Prior Year 2 Weight

(2g) Is 2a blank? 2g ☐ Yes ☐ No If "Yes," move on to the "Prior Year 1 Weight" section.	
(2h) Enter the count from 2a	2h
(2i) Enter the average from 2f	2i
(2j) Prior Year 2 Weight: Divide 2h by 2i	2j

Prior Year 1 Weight

(2k) Is 2b blank? 2k ☐ Yes ☐ No If "Yes," move on to the "Current Year Weight" section.	
(2l) Enter the count from 2b	2l
(2m) Enter the average from 2f	2m
(2n) Divide 2l by 2m	2n
(2o) If 2g is "Yes," enter 1; if 2g is "No," enter 1.25	2o
(2p) Prior Year 1 Weight: Multiply 2n by 2o	2p

Current Year Weight

(2q) Are both 2a and 2b blank? 2q ☐ Yes ☐ No If "Yes," skip to 2u.	
(2r) Enter the count from 2c	2r
(2s) Enter the average from 2f	2s
(2t) Divide 2r by 2s	2t

(2u) If 2q is "Yes," enter 1; if 2q is "No," enter 1.5 | 2u

(2v) Current Year Weight: Multiply 2t by 2u | 2v

Step 3: Combine Points and Weights

If a year does not have data, leave that year's boxes blank.

Prior Year 2 Score

(3a) Enter the average from 1d | 3a

(3b) Enter the weight from 2j | 3b

(3c) Prior Year 2 Score: Multiply 3a by 3b | 3c

Prior Year 1 Score

(3d) Enter the average from 1h | 3d

(3e) Enter the weight from 2p | 3e

(3f) Prior Year 1 Score: Multiply 3d by 3e | 3f

Current Year Score

(3g) Enter the average from 1l | 3g

(3h) Enter the weight from 2v | 3h

(3i) Current Score: Multiply 3g by 3h | 3i

Step 4: Calculate Component Score

(4a) Enter the score from 3c | 4a | (4e) Enter the weight from 2j | 4e

(4b) Enter the score from 3f | 4b | (4f) Enter the weight from 2p | 4f

(4c) Enter the score from 3i | 4c | (4g) Enter the weight from 2v | 4g

(4d) Add 4a through 4c | 4d | (4h) Add 4e through 4g | 4h

(4i) Divide 4d by 4h | 4i

(4j) Enter the number of possible points | 4j

(4k) 8th Grade Mathematics Achievement Score: Multiply 4i by 4j | 4k

3rd Grade English Language Arts Achievement Worksheet

Step 1: Assign and Average Points

If a year does not have data shown, leave that year's boxes blank.

Prior Year 2 Average

(1a) Total points earned (B) | 1a

(1b) Count of students tested (A) | 1b

(1c) Is 1a greater than 1b? | 1c ☐ Yes ☐ No

(1d) Average: If 1c is "Yes," enter 1; if 1c is "No," divide 1a by 1b | 1d

Prior Year 1 Average

(1e) Total points earned (D) | 1e

(1f) Count of students tested (C) | 1f

(1g) Is 1e greater than 1f? | 1g ☐ Yes ☐ No

(1h) Average: If 1g is "Yes," enter 1; if 1g is "No," divide 1e by 1f | 1h

Current Year Average

(1i) Total points earned (F) | 1i

(1j) Count of students tested (E) | 1j

(1k) Is 1i greater than 1j? | 1k ☐ Yes ☐ No

(1l) Average: If 1k is "Yes," enter 1; if 1k is "No," divide 1i by 1j | 1l

Step 2: Calculate Annual Weights

Average Enrollment

(2a) Prior Year 2 count of students tested (A) – leave blank if not shown

2a	

(2b) Prior Year 1 count of students tested (C) – leave blank if not shown

2b	

(2c) Current Year count of students tested (E)

2c	

(2d) Add 2a through 2c

2d	

(2e) How many of 2a through 2c have values?

2e	

(2f) Average number tested: Divide 2d by 2e

2f	

Prior Year 2 Weight

(2g) Is 2a blank?   2g ☐ Yes ☐ No   If "Yes," move on to the "Prior Year 1 Weight" section.

(2h) Enter the count from 2a

2h	

(2i) Enter the average from 2f

2i	

(2j) Prior Year 2 Weight: Divide 2h by 2i

2j	

Prior Year 1 Weight

(2k) Is 2b blank?   2k ☐ Yes ☐ No   If "Yes," move on to the "Current Year Weight" section.

(2l) Enter the count from 2b

2l	

(2m) Enter the average from 2f

2m	

(2n) Divide 2l by 2m

2n	

(2o) If 2g is "Yes," enter 1; if 2g is "No," enter 1.25

2o	

(2p) Prior Year 1 Weight: Multiply 2n by 2o

2p	

Current Year Weight

(2q) Are both 2a and 2b blank?   2q ☐ Yes ☐ No   If "Yes," skip to 2u.

(2r) Enter the count from 2c

2r	

(2s) Enter the average from 2f

2s	

(2t) Divide 2r by 2s

2t	

(2u) If 2q is "Yes," enter 1; if 2q is "No," enter 1.5

2u	

(2v) Current Year Weight: Multiply 2t by 2u

2v	

Step 3: Combine Points and Weights

If a year does not have data, leave that year's boxes blank.

Prior Year 2 Score

(3a) Enter the average from 1d

3a	

(3b) Enter the weight from 2j

3b	

(3c) Prior Year 2 Score: Multiply 3a by 3b

3c	

Prior Year 1 Score

(3d) Enter the average from 1h

3d	

(3e) Enter the weight from 2p

3e	

(3f) Prior Year 1 Score: Multiply 3d by 3e

3f	

Current Year Score

(3g) Enter the average from 1l

3g	

(3h) Enter the weight from 2v

3h	

(3i) Current Score: Multiply 3g by 3h

3i	

Step 4: Calculate Component Score

(4a) Enter the score from 3c	4a	(4e) Enter the weight from 2j	4e
(4b) Enter the score from 3f	4b	(4f) Enter the weight from 2p	4f
(4c) Enter the score from 3i	4c	(4g) Enter the weight from 2v	4g

(4d) Add 4a through 4c | 4d |

(4h) Add 4e through 4g | 4h |

(4i) Divide 4d by 4h | 4i |

(4j) Enter the number of possible points | 4j |

(4k) 3rd Grade English Language Arts Achievement Score: Multiply 4i by 4j | 4k |

Calculating Student Engagement Indicator Deductions

Some measures in our school accountability system do not show a wide range of variation between schools but rather allow us to identify the small number of schools whose performance raises concern. Instead of including these measures within one of the Priority Areas, we place them into a separate category called Student Engagement Indicators. Failure to meet specific statewide goals for these indicators results in points being deducted from the school's weighted average Priority Areas score. The weighted average Priority Areas score minus any Student Engagement Indicator deductions equals the school's Overall Accountability Score.

The two Student Engagement Indicators are:

- **Absenteeism Rate:** Chronic absenteeism is a strong predictor of whether a student will struggle academically or fail to graduate. For this Student Engagement Indicator, **the school's absenteeism rate is equal to the percentage of its students who are chronically absent.** Chronically absent means a student missed school at least 16 percent of the time. **The goal for this Student Engagement Indicator is a school absenteeism rate of less than 13 percent**—that is, less than 13 percent of a school's students were chronically absent as measured by either a one-year or multi-year rate, whichever is more favorable. Only students in kindergarten through 12th grade are included in absenteeism calculations.

  If a school's absenteeism rate is 13 percent or more, the school's score is reduced by five points.

- **Dropout Rate:** Dropping out of school has a profound impact on a student's future success. **The goal for this Student Engagement Indicator is a dropout rate of less than 6 percent**.

  If a school has a dropout rate of 6 percent or more, its school score is reduced by five points.

These deductions are summarized in the table below:

Student Engagement Indicator	Status	Deduction
Absenteeism	School absenteeism rate < 13%	None
	School absenteeism rate ≥ 13%	5 points
Dropout Rate	School dropout rate < 6%	None
	School dropout rate ≥ 6%	5 points

Each missed indicator results in a separate deduction from the weighted average Priority Areas score. For example, a school that misses the goals for absenteeism rate and dropout rate would be penalized 10 points.

The School Report Card Detail does not contain enough data to reproduce the exact calculations for the Student Engagement Indicators, so no worksheet is provided for these measures. Instead, this section will thoroughly detail the process by which each of the Student Engagement Indicators is calculated.

Absenteeism

Chronic absenteeism is highly correlated with low achievement and is a strong predictor of whether a student will struggle academically or fail to graduate. For this Student Engagement Indicator, the school's absenteeism rate is defined as the percentage of its students who are chronically absent. For the purposes of this indicator, chronically absent is defined as a student who misses school 16 percent of the time or more. The goal for this Student Engagement Indicator is a school absenteeism rate of less than 13 percent—that is, less than 13 percent of the school's students were chronically absent.

Remember that the attendance data used in absenteeism calculations are lagged by one year. As such, the "current year" calculations are based upon the most recent year of data available. In other words, absenteeism and attendance calculations for 2016-17 report cards are based on 2015-16 attendance data.

Whether a school meets the absenteeism rate goal is determined using the current year absenteeism rate or, when multi-year rate data are available, using both the current year and multi-year absenteeism rates. The multi-year absenteeism rate is calculated based on the number of years in which a school has at least 20 students enrolled in tested grades, up to a maximum of three years. For most schools, the multi-year absenteeism rate will be calculated using absenteeism data from the last three years; however, some schools' multi-year absenteeism rate will be calculated using the last two years. Schools in which there are at least 20 students enrolled in only the current year will use only the current year's absenteeism rate for determining whether or not the school met the goal.

Calculating Absenteeism Rate in the Current Year

To calculate your school's current year absenteeism rate, use the following steps:

1. Count the number of students who enrolled in your school for at least 45 days at any time during the prior school year. Due to data collection timelines, DPI must use the prior year's enrollment and attendance data to calculate the absenteeism rate.
2. For each individual student in Step 1, calculate that student's attendance rate. This is done by dividing the total number of days the student attended school by the total number of possible days the student could have attended school. **Note that DPI does <u>not</u> have data on excused versus unexcused absences – it is the district's responsibility to ensure that attendance days are being recorded and reported in accordance with DPI guidelines.**

$$\text{Individual Student Attendance Rate} = \frac{\text{Total Number of Days of Attendance}}{\text{Total Number of Possible Days of Attendance}}$$

3. Count the number of students whose attendance rate is 84.0% or below. These students are flagged as being chronically absent. Apply traditional rounding rules to round the attendance rate to one decimal place – for example, an attendance rate of 84.05% would round up to 84.1%, and the student would not be flagged as chronically absent.
4. Divide the count of students flagged as chronically absent (Step 3) by the count of enrolled students (Step 1). This is the school's current year absenteeism rate. Note that no rounding takes place when calculating the absenteeism rate – for example, if a school's absenteeism rate is 12.9%, it will **not** be rounded up to 13%.

$$\text{Current Year Absenteeism Rate} = \frac{\text{Number of Students Chronically Absent}}{\text{Number of Students Enrolled}}$$

Calculating Absenteeism Rate over Multiple Years

To calculate multi-year absenteeism rate, use the following steps:

1. Count the number of students who enrolled in your school for at least 45 days in a given year for each of the prior three years. For example, if a student was enrolled for 45 days in the current year and 45 days in the prior year that student would be considered separately for each year. Due to data collection timelines, the prior year's data is the most recent data to be used when calculating the absenteeism rate.
2. For each individual student in Step 1, calculate that student's attendance rate in each year. This is done by dividing the total number of days the student attended school in a given year by the total number of possible days the student could have attended school in that year.
3. Count the number of students whose attendance rate is 84.0% or below. Each year that their attendance rate is 84.0% or below is counted separately. For example, if a student's attendance rate was 84.0% or below in the current year and 84.0% or below in the prior year that student would be counted twice as being chronically absent. Apply traditional rounding rules to round the attendance rate to one decimal place – for example, an attendance rate of 84.05% would round up to 84.1%, and the student would **not** be flagged as chronically absent.
4. Divide the count of students flagged as chronically absent (Step 3) by the total count of enrolled students across the three years (Step 1). This is the school's multi-year absenteeism rate. Note that no rounding takes place when calculating the absenteeism rate – for example, if a school's absenteeism rate is 12.9%, it will **not** be rounded up to 13%.

$$\text{Current Year Absenteeism Rate} = \frac{\text{Number of Students Chronically Absent}}{\text{Number of Students Enrolled}}$$

Determining the Deduction

Once both the current year absenteeism rate and the multi-year absenteeism rate have been calculated, take the following steps:

1. If the school's current year absenteeism rate and the school's multi-year absenteeism rate are greater than or equal to 13%, five points will be deducted from the school's Overall Accountability Score.
2. If the school has only absenteeism data for the current year and the current year absenteeism rate is greater than or equal to 13%, five points will be deducted from the school's Overall Accountability Score.

Dropout

Dropping out of school severely limits a student's chances for success. The goal for this Student Engagement Indicator is a **dropout rate of less than 6 percent**.

The data used in dropout calculations are lagged by one year. As such, the "current year" calculations are based upon the most recent year of data available. In other words, dropout calculations for 2016-17 report cards are based on 2015-16 dropout data.

Whether a school meets the dropout rate goal is determined using the current year dropout rate or, when multi-year rate data are available, using both the current year and multi-year dropout rates. The multi-year dropout rate is calculated based on the number of years in which a school has at least 20 students enrolled in tested grades, up to a maximum of three years. For most schools, the multi-year dropout rate will be calculated using dropout data from the last three years; however, some schools' multi-year dropout rate will be calculated using the last two years. Schools in which there are at least 20 students enrolled in only the current year will use only the current year's dropout rate for determining whether or not the school met the goal. This indicator only considers dropout data for students in grades 7 through 12.

To calculate your school's dropout rate, use the following steps:

Calculating the Dropout Rate for the Current Year

1. Count the number of students who enrolled in your school who were in 7th grade or above in the prior year. Note that due to data collection timelines, the prior year's data must be used when calculating the dropout rate. In other words, for 2016-17 report cards, 2015-16 enrollment data are used.
2. Count the number of students who were in 7th grade or above who were considered to be either half-term or full-term dropouts.
3. Divide the count of total dropouts (determined in Step 2) by the count of total students (determined in Step 1). This is the school's current year dropout rate. Note that no rounding takes place when calculating the dropout rate – for example, if a school's dropout rate is 5.9%, it will **not** be rounded up to 6%. This school would be considered to be meeting the goal.

$$\text{Current Year Dropout Rate} = \frac{\text{Number of Dropouts}}{\text{Number of Students Enrolled}}$$

Calculating the Dropout Rate over Multiple Years

1. Count the number of students who enrolled in your school who were in 7th grade or above in the three prior years. Note that due to data collection timelines, the prior year's data is the most recent data to be used when calculating the dropout rate. For example, for 2016-17 report cards, 2015-16, 2014-15, and 2013-14 enrollment data are used to calculate the multi-year dropout rate.
2. Count the number of students who were considered to be either half-term or full-term dropouts in the three prior years.
3. Divide the count of total dropouts (determined in Step 2) by the count of total students (determined in Step 1). This is the school's multi-year dropout rate. Note that no rounding takes place when calculating the dropout rate – for example, if a school's dropout rate is 5.9%, it will not be rounded up to 6%. This school would be considered to be meeting the goal.

$$\text{Current Year Dropout Rate} = \frac{\text{Number of Dropouts}}{\text{Number of Students Enrolled}}$$

Determining the Deduction

After both the current year dropout rate and the multi-year dropout rate have been calculated, take the following steps:

1. If the dropout rate from Step 3 for both the Current Year and Multi-Year is 6% or above, a five point deduction will be taken from the school's Overall Accountability Score.
2. If the school has only dropout data for the current year and the current dropout rate is 6% or above, a five point deduction will be taken from the school's Overall Accountability Score.

Test Participation Supplemental Data

Test Participation was previously a Student Engagement Indicator, for which schools and districts could receive a deduction for having a test participation rate of less than 95 percent for the all student group and/or student groups. Test participation rates no longer affect scoring on the report cards; however, these data are still reported given their importance in highlighting educational inequities. As such, the current year test participation rate is provided as supplemental information alongside of the Student Engagement Indicators. Test participation rates for ELA and mathematics are provided by subgroup.

To calculate test participation for the current year, follow the steps below:

1. Count the total number of students enrolled in tested grades at test time in the current year. This should be done at the "All Students" level **and** for each group of students. If a student group has fewer than 20 students enrolled, a test participation rate cannot be calculated for that group, and the group is excluded from the test participation Student Engagement Indicator determination.

2. For groups with at least 20 enrolled students, count the total number of students who were assessed using either the general assessment (e.g., Forward, ACT) or the alternate assessment (e.g., DLM). This should be done at the "All Students" level **and** for each group of students. This step should be done separately for both math and ELA. For students for whom this was their first year in the country, participation in the ACCESS for English Language Learners test may be used in place of participation for the ELA assessment. To determine each group's current year participation rate, divide the number of students tested (the count from Step 2) by the number of students enrolled (the count from Step 1). This should be done at the "All Students" level, **and** for each group of students. This step should be done separately for both mathematics and English language arts.().

3. Apply traditional rounding rules, rounding to the nearest whole number. For example, if a group had at least 20 students enrolled and its participation rate in mathematics was 94.8%, its participation rate in mathematics would round up to 95%, and the group would be considered to be meeting the goal.
